FUCR - Follow-up Compliance Review

Review identification, purpose and base

FUCR · v0.7

Study / protocol	CIP version	Site / code	FUCR ID
Period reviewed / data cut-off	**Previous FUCR**	**Review type** ☐ Routine ☐ Intensified ☐ Triggered	**Review date**
Reason or trigger (if not routine)		**Prepared by / role**	**Accountable reviewer / role**

A Purpose and use

The FUCR reviews follow-up across all participants due in one period. It counts what the Participant Follow-up Visit Records (PFVR) show and does not reopen them: whether visits happened in their window (C, E), whether each required component was done (D), why something was missed (F) and what the site will change (H). Its result feeds indicator 3 of the Performance Indicator Record (PIR), which applies the rule.

Unit of analysis	Decision supported	Inputs	Outputs
One site and one period: visits expected, completed and their components.	Whether follow-up is under control or needs correction, and where the problem sits.	PFVRs of the period, CIP visit schedule, outreach records, IQL for images.	The four measures for the PIR; causes, actions and their check.

B Review base

Fix the base before counting. Write counts with their units; never change a denominator to make periods look alike.

Participants with a visit due in the period	
Visits expected in the period	
PFVRs used (IDs or range) and any missing	
Comparable previous period (same CIP and schedule?)	

FUCR - Follow-up Compliance Review

Follow-up measures and components

FUCR · v0.7

FUCR ID	Site / code	Period / data cut-off	Previous FUCR

C The four follow-up measures

Count from the PFVRs. The decision applies the rule of PIR indicator 3.

Measure	Count	Base	Result (%)	Previous period	Change	Decision	PFVRs counted
1 · Visits completed within their window		Expected visits				☐ Within rule ☐ Closer review ☐ Action required ☐ Not assessable	
2 · Visits with every required component		Completed visits				☐ Within rule ☐ Closer review ☐ Action required ☐ Not assessable	
3 · Visits missing an endpoint component		Completed visits needing it				☐ Within rule ☐ Closer review ☐ Action required ☐ Not assessable	
4 · Participants not seen despite documented efforts		Participants due				☐ Within rule ☐ Closer review ☐ Action required ☐ Not assessable	

D Components

Count a component only at visits where the CIP requires it; write Not required, not zero.

Component	Expected	Complete	Missing	Complete (%)	PFVRs with a missing component
Imaging					
Clinical scores (for example Constant)					
Participant questionnaires					
Range of motion and examination					
Interval safety review					
Other component of the CIP					

FUCR - Follow-up Compliance Review

Timing and causes

FUCR ID	Site / code	Period / data cut-off	Previous FUCR

E Timing

Each expected visit counted once.

Timing	Count	Base	Result (%)	PFVRs
Within the window				
Early, outside the window				
Late, up to 7 days outside				
Late, more than 7 days outside				
Not obtained after documented efforts				

F Main causes

One main cause per problem, from the PFVR. Look for concentration: same staff member, week, visit type or component.

Cause	Count	Measure affected (#)	Attribution	PFVRs	Concentration seen
Participant availability			☐ Site ☐ Participant ☐ Protocol ☐ Mixed		
Scheduling			☐ Site ☐ Participant ☐ Protocol ☐ Mixed		
Staffing or absence			☐ Site ☐ Participant ☐ Protocol ☐ Mixed		
Imaging			☐ Site ☐ Participant ☐ Protocol ☐ Mixed		
Assessment not done correctly			☐ Site ☐ Participant ☐ Protocol ☐ Mixed		
Protocol design			☐ Site ☐ Participant ☐ Protocol ☐ Mixed		

FUCR - Follow-up Compliance Review

Method check and actions

FUCR ID	Site / code	Period / data cut-off	Previous FUCR

G Method check (when needed)

Only when C to F point to how an assessment is done. Otherwise write Not needed and why.

Area checked	Why and which PFVRs	What was found	Linked record

H Actions

One row per cause the site must correct, not per missed visit. Set the check that will show the action worked.

Action	What will change (cause in F)	Receiving record	Owner	Due	How we will know it worked

FUCR - Follow-up Compliance Review

Earlier actions and conclusion

FUCR ID	Site / code	Period / data cut-off	Previous FUCR

I Did earlier actions work?

Done is not the same as effective.

Action	Check set when assigned	What this period shows	Result
			☐ Worked ☐ Did not work ☐ Too early
			☐ Worked ☐ Did not work ☐ Too early

J Conclusion

Follow-up in this period	☐ Under control ☐ Under control, watch next period ☐ Action required ☐ Escalation required
Basis (measures, causes, records)	
Sent to (PIR indicator 3, IMC, CAPA, SRR, POT)	
Next review
