IQL — IMAGING QUALITY LOG

v0.5 · Local imaging quality

STUDY / PROTOCOL / CIP VERSION	SITE / CODE	IQL RECORD ID / REVISION	REVIEW PERIOD / CUT-OFF DATE

APPLICABLE IMAGING CHARTER / MANUAL ID AND VERSION	INCLUDED MODALITY / TIME-POINT SCOPE
PREPARED BY / DATE	**CONTROLLED RECORD LOCATION**

A Purpose and Use

Record each required image set at acquisition or first availability, using the applicable sponsor Imaging Charter or imaging manual. Document acquisition timing, required-set completeness, technical quality, the local use decision and retrievable source evidence.

Link to PSEAR (screening and eligibility) or PFVR (follow-up) as applicable. Clinical interpretation, eligibility decisions and sponsor or central endpoint review remain in their authoritative records.

Element	Scope / Decision	Record / Link
Unit of analysis	One required image set for one participant and one protocol time point.	IQL Record ID + image-set ID; participant, time point and linked PSEAR/PFVR ID.
Decision supported	Whether the set is complete, technically adequate and locally usable for its defined purpose; identify any limitation, repeat or second review needed.	Record the four classifications in the image-set log. Pending review is not a positive use decision.
Inputs	Applicable CIP, sponsor imaging requirements, acquisition metadata, required views or sequences, source images and authorised review evidence.	Charter/manual ID and version above; set-specific requirement and archive/transfer reference in the image-set log.
Outputs	Traceable image-set status for PSEAR/PFVR and a linked response for unresolved or recurring quality issues.	Image-set resolution record; SART, deviation, IMC, SRR or CAPA ID when applicable. FUCR receives visit evidence from PFVR.

B Image-Set Classification Guide

Illustrations only, not acceptance thresholds. Apply the approved Imaging Charter/manual. Assess each dimension separately; these examples are a reminder, not fields to complete.

Dimension	What to distinguish	Example / recording reminder
Timing	Assess acquisition against its applicable window; retain the actual date.	Window ends 24 Sep; acquired 26 Sep: Outside. Later recovery does not make the original acquisition timely.
Set completeness	Compare required views or sequences with what was actually acquired.	Two of three required views: Partial. Technically clear images do not establish a complete set.
Technical quality	Assess positioning, coverage and other sponsor-defined technical criteria.	All views present, but positioning limits assessment: Limited. No images available: Not assessed.
Local use decision	Record whether the set can support its stated local purpose, including any restriction.	A necessary second review is outstanding: Pending. Limited use needs a documented permitted purpose; it does not establish central acceptance.

STUDY / SITE CODE	IQL RECORD ID / REVISION	IMAGING CHARTER / MANUAL VERSION	REVIEW PERIOD / SHEET NO.

C Image-Set Quality Log Against Sponsor Imaging Requirements

One row per image set. Link PSEAR/PFVR when applicable. Use Resolution / Route ID only for an exception, repeat, second review or other response; otherwise enter N/A. Do not rely on a set for a use that remains pending. Local acceptance does not establish central acceptance.

Set ID	Participant / Time Point	PSEAR / PFVR ID	Modality / Required Set / Requirement Ref.	Planned Window / Actual Acquisition Date	Timing	Required Set Complete?	Technical Quality	Local Use Decision	Archive / Transfer / Receipt Ref.	Reviewer / Date	Resolution / Route ID
01					☐ In window ☐ Outside ☐ Pending ☐ N/A	☐ Complete ☐ Partial ☐ Missing ☐ N/A	☐ Adequate ☐ Limited ☐ Not conforming ☐ Not assessed	☐ Usable ☐ Limited use ☐ Pending ☐ Not usable			
02					☐ In window ☐ Outside ☐ Pending ☐ N/A	☐ Complete ☐ Partial ☐ Missing ☐ N/A	☐ Adequate ☐ Limited ☐ Not conforming ☐ Not assessed	☐ Usable ☐ Limited use ☐ Pending ☐ Not usable			
03					☐ In window ☐ Outside ☐ Pending ☐ N/A	☐ Complete ☐ Partial ☐ Missing ☐ N/A	☐ Adequate ☐ Limited ☐ Not conforming ☐ Not assessed	☐ Usable ☐ Limited use ☐ Pending ☐ Not usable			
04					☐ In window ☐ Outside ☐ Pending ☐ N/A	☐ Complete ☐ Partial ☐ Missing ☐ N/A	☐ Adequate ☐ Limited ☐ Not conforming ☐ Not assessed	☐ Usable ☐ Limited use ☐ Pending ☐ Not usable			
05					☐ In window ☐ Outside ☐ Pending ☐ N/A	☐ Complete ☐ Partial ☐ Missing ☐ N/A	☐ Adequate ☐ Limited ☐ Not conforming ☐ Not assessed	☐ Usable ☐ Limited use ☐ Pending ☐ Not usable			

Continue image-set IDs on additional log sheets. Use IQL Record ID + set ID for unique links. Retain the original entry and cross-reference any repeat acquisition.

IQL — IMAGING QUALITY LOG

v0.5 · Local imaging quality

STUDY / SITE CODE	IQL RECORD ID / REVISION	IMAGING CHARTER / MANUAL VERSION	REVIEW PERIOD / SHEET NO.

D Periodic Imaging-Quality Summary and Handoff

Summarise the reviewed image sets. Record the distinct-set count and relevant IDs; categories may overlap. Refer recurring or unresolved issues to the owning record without duplicating FUCR indicators or a CAPA plan.

IMAGE-SET IDS / SCOPE REVIEWED	DISTINCT IMAGE SETS REVIEWED (N)

Quality Aspect	Count / N and Image-set IDs	Finding / No Further Action or Linked Route
Set completeness — partial or missing		
Technical quality — limited or non-conforming		
Local use — pending or not usable		
Repeat acquisition / second review required during period		

E Image-Set Resolution and Linked Route

Record immediate resolution and evidence of the resulting use decision. Cite a CAPA, risk, deviation or safety record when that route is needed. Keep this response open until the local resolution or required handoff is documented.

Resolution ID / Set ID / Issue / Use Impact	Immediate Response / Repeat / Second Review	Resolution Evidence / Updated Local Use / Date	Linked Participant / Governed Record	Owner / Due Date	Status
					☐ Open ☐ Resolved ☐ Handed off
					☐ Open ☐ Resolved ☐ Handed off
					☐ Open ☐ Resolved ☐ Handed off

STUDY / SITE CODE	IQL RECORD ID / REVISION	IMAGING CHARTER / MANUAL VERSION	REVIEW PERIOD / SHEET NO.

F Current Period Imaging-Quality Conclusion

Select the status reflecting the highest unresolved issue in the reviewed scope. This conclusion concerns local imaging quality and outstanding routes, not participant eligibility or central endpoint adjudication.

Conclusion	Meaning / Response	Select One	Conclusion Date / Next Review
Controlled / no open issue	Reviewed entries support their documented local use; no unresolved quality issue or handoff is known.	☐ Select	
Controlled with limitation	A documented limitation permits the defined local use, with any required conditions or follow-up identified.	☐ Select	
Resolution / handoff pending	A repeat, second review, traceability correction or linked quality response remains open.	☐ Select	
Use restricted / escalated	At least one set remains restricted for its intended use or requires PI, safety, sponsor or other governed review.	☐ Select	

Scope / Affected Image-set IDs / Basis and Open Routes

G Accountable Local Review and Record Location

The local imaging reviewer signs this review. Obtain PI review when required by the CIP or sponsor instructions, or when an unresolved restriction, repeated failure, safety route or impact on an eligibility/endpoint decision requires PI attention.
