PFVR — PARTICIPANT FOLLOW-UP VISIT RECORD

v0.4 - SIMULATED

SITE NAME / CODE	STUDY / PROTOCOL / CIP VERSION	PARTICIPANT ID	PFVR RECORD ID
Northbridge Orthopaedic Site / NB-014	NB-Shoulder-01 / CIP V3.2	NB014-0032	PFVR-NB014-0032-D30
VISIT NUMBER / NAME	**TARGET VISIT DATE**	**INITIAL VISIT DATE**	**DEVICE / STUDY ARM**
Day 30 follow-up	17 Sep 2026	23 Sep 2026	Shoulder device / device arm
VISIT WINDOW — START / END / REFERENCE DATE		**VISIT OCCURRENCE — NOT COMPONENT COMPLETION**	
10-24 Sep 2026; index procedure 18 Aug; target Day 30 (days 23-37)		☒ Attended ☐ Missed ☐ Pending	

A Purpose and Use

Use one PFVR for one participant and one protocol-defined follow-up visit. Record each required component, its method, actual date, evidence and findings. The visit date and component dates may differ.

Record later contacts for this same visit in C and update the linked component in D without obscuring earlier entries. Assess completion after reviewing the component evidence; documentation alone does not correct a missed method or window requirement.

This individual source record feeds the FUCR. Reference clinical, safety and deviation records when needed; aggregate compliance analysis remains in the FUCR.

B Applicable Visit Component Guide

Component family	Examples that may be applicable	Record in the visit component table
Imaging and objective tests	• CT • Radiographic examination • MRI • Ultrasound • Laboratory tests • Other protocol-defined tests	• Test performed • Date and window • Result available • Reviewer • Finding • Linked record
Patient-reported outcomes	• Pain • Discomfort • Functional limitation • Instability • Swelling • New symptom • Persistent symptom • Improvement / satisfaction	• Participant's words • Onset / duration • Severity / relevance • Change since prior visit • Action or referral • Linked record
Clinical and functional assessment	• Physical examination • Range of motion • Strength • Stability • Gait • Wound status • Functional score • Questionnaire / device exam	• Method / instrument • Assessor • Result • Comparison with prior visit • Relevant change • Action
Care and safety review	• Physiotherapy evaluation • Medication review • Safety review • Referral / complication follow-up	• Responsible person • Completion status • Linked record • Escalation • Follow-up action

C Visit Contacts and Later Component Completion

For a later contact belonging to this same scheduled visit, keep the PFVR ID and link the component number. Record a distinct protocol-defined visit in its own PFVR.

Contact	Actual Date / Mode	D Component No.	Purpose / result / source reference
Initial	23 Sep 2026 / in person	1, 3-6	Visit Day 36, within window. Clinical and PRO components completed; radiographs pending because the unit was unavailable.
Return	26 Sep 2026 / imaging return	2	Required views completed Day 39, two days late. Same visit record; IMG-D30 / IQL-014.
Return	N/A	N/A	No further return contact for this visit. Final documentation reviewed 30 Sep 2026.

PARTICIPANT ID	PFVR RECORD ID	VISIT NUMBER / NAME
NB014-0032	PFVR-NB014-0032-D30	Day 30 follow-up

D Required Visit Components — Completion and Timing

No.	Component / Assessment — identify CtQ	Required / Actual Method	Planned Date / Window	Actual Assessment Date(s)	Completion	Timing	Result / Evidence / Impact / J Link
1	Shoulder / wound examination; CtQ: Yes	CIP examination / inspection and palpation	17 Sep; 10-24 Sep / days 23-37	23 Sep / Day 36	☒ Complete ☐ Partial ☐ Missed ☐ Pending	☒ In window ☐ Late ☐ Pending ☐ N/A	Healed wound; no new concern. Dr Sofia Chen; CV-D30.
2	Shoulder radiographs; CtQ: Yes	CIP: AP, scapular Y, axillary / all obtained	17 Sep; 10-24 Sep / days 23-37	26 Sep / Day 39	☒ Complete ☐ Partial ☐ Missed ☐ Pending	☐ In window ☒ Late ☐ Pending ☐ N/A	Two days late; views reviewed. IMG-D30; IQL-014; J1 / DEV-013.
3	Pain NRS; CtQ: Yes	CIP pain question / NRS administered	17 Sep; 10-24 Sep / days 23-37	23 Sep / Day 36	☒ Complete ☐ Partial ☐ Missed ☐ Pending	☒ In window ☐ Late ☐ Pending ☐ N/A	Pain 2/10; Day 7: 4/10. PRO-D30; no new action.
4	Functional recovery; CtQ: Yes	CIP recovery interview / administered	17 Sep; 10-24 Sep / days 23-37	23 Sep / Day 36	☒ Complete ☐ Partial ☐ Missed ☐ Pending	☒ In window ☐ Late ☐ Pending ☐ N/A	Self-care improved; overhead limitation persists. PRO-D30.
5	Medication review; CtQ: No	CIP reconciliation / list reviewed	17 Sep; 10-24 Sep / days 23-37	23 Sep / Day 36	☒ Complete ☐ Partial ☐ Missed ☐ Pending	☒ In window ☐ Late ☐ Pending ☐ N/A	No unrecorded change. MED-D30 / CV-D30.
6	Interval safety review; CtQ: No	PI interview and clinical review / done	17 Sep; 10-24 Sep / days 23-37	23 Sep / Day 36	☒ Complete ☐ Partial ☐ Missed ☐ Pending	☒ In window ☐ Late ☐ Pending ☐ N/A	No new event identified; prior status reviewed. CV-D30.
7	Not used	N/A	N/A	N/A	☐ Complete ☐ Partial ☐ Missed ☐ Pending	☐ In window ☐ Late ☐ Pending ☒ N/A	N/A
8	Not used	N/A	N/A	N/A	☐ Complete ☐ Partial ☐ Missed ☐ Pending	☐ In window ☐ Late ☐ Pending ☒ N/A	N/A

E Imaging and Objective Assessment Review

Review question	Yes	No	Finding / action / linked record
Were required imaging or objective assessments performed?	☒	☐	Shoulder radiographs obtained 26 Sep; two days late. IMG-NB014-0032-D30.
Are results available and reviewed by an appropriately qualified person?	☒	☐	Elena Martin completed image QC; Dr Sofia Chen reviewed the clinical report 26 Sep. IQL-014 / CV-D30.
Was an abnormal, unexpected or clinically relevant finding identified?	☐	☒	No new clinically relevant imaging finding. Required views available; timing exception remains in J.

PFVR — PARTICIPANT FOLLOW-UP VISIT RECORD

v0.4 - SIMULATED

PARTICIPANT ID	PFVR RECORD ID	VISIT NUMBER / NAME
NB014-0032	PFVR-NB014-0032-D30	Day 30 follow-up

F Participant-Reported Status Since Previous Visit

Open participant report: Record the participant's own relevant comments, including negative, persistent or positive changes. Do not classify a report as an adverse event solely within this section; refer it for the appropriate clinical or safety assessment when indicated.

Reported change / concern	Onset / duration / severity	Change since previous visit	Action / referral	Linked record
"The shoulder is less painful."	2/10 on 23 Sep; 4/10 at Day 7.	☒ Improved ☐ Worse ☐ Unchanged	PI reviewed pain and the existing analgesic plan.	PRO-D30 / CV-D30
"Getting dressed is easier; reaching overhead is still difficult."	Self-care improved since Day 7; overhead activity limited.	☒ Improved ☐ Worse ☐ Unchanged	PI reviewed the recorded rehabilitation plan.	PRO-D30 / CV-D30
"No new swelling, drainage or fever."	Negative interval report since Day 7.	☐ Improved ☐ Worse ☒ Unchanged	PI assessed with the clinical examination; no new event identified.	CV-D30 / safety review
No additional concern reported.	Interview completed 23 Sep.	☐ Improved ☐ Worse ☒ Unchanged	No additional referral indicated in the source.	CV-D30

G Clinical and Physical Assessment

Assessment performed	Assessor / role	Method / instrument	Result / comparison with previous visit	Clinically relevant change / action
Shoulder incision / wound	Dr Sofia Chen / PI	Inspection and palpation	Dry healed incision; improved since Day 7.	No wound concern; CV-D30.
Shoulder ROM	Dr Sofia Chen / PI	Protocol goniometry	Passive flexion 90 degrees; Day 7: 70.	PI reviewed progress; CV-D30.
Functional recovery	Dr Sofia Chen / PI	Protocol-defined interview	Self-care improved; overhead limitation remains.	Existing rehabilitation plan reviewed.
Interval symptoms / safety	Dr Sofia Chen / PI	Interview and examination	No new event identified at this review.	No new SART case; clinical source retained.

H Personnel and Continuity

Role / activity	Name / qualification	Same as previous visit?	Continuity, handover or supervision note
Operator / imaging assessor	Elena Martin / Imaging Lead	☒ Yes ☐ No ☐ N/A	Same lead as Day 7. QC and acquisition personnel recorded in IMG-D30 / IQL-014.
Clinician / physical assessor	Dr Sofia Chen / Principal Investigator	☒ Yes ☐ No ☐ N/A	Same clinician as Day 7; prior findings reviewed in CV-D30.
Physiotherapist / functional assessor	No separate specialist assessor	☐ Yes ☐ No ☒ N/A	PI reviewed function. No separate physiotherapy assessment required at this visit by the simulated schedule.

PFVR — PARTICIPANT FOLLOW-UP VISIT RECORD

v0.4 - SIMULATED

PARTICIPANT ID	PFVR RECORD ID	VISIT NUMBER / NAME
NB014-0032	PFVR-NB014-0032-D30	Day 30 follow-up

I Visit Compliance Review — After Component Assessment

Control Point	Status	Comment / Reference
The visit occurred within its nominal visit window (initial date and C).	☒ Complete ☐ Partial ☐ No ☐ N/A	Initial visit 23 Sep / Day 36; window ends 24 Sep / Day 37. Return dates in C.
The visit followed the current protocol and visit instructions.	☐ Complete ☒ Partial ☐ No ☐ N/A	Visit itself timely; radiographs Day 39, two days outside the window. DEV-NB014-2026-013.
Required assessments used the intended method (D; explain any difference).	☒ Complete ☐ Partial ☐ No ☐ N/A	CIP methods used for all six components. Required radiographic views obtained; see D / E.
Results and participant reports were documented and reviewed.	☒ Complete ☐ Partial ☐ No ☐ N/A	Clinical / PRO review 23 Sep; imaging review 26 Sep; final PI review 30 Sep.
Any late, partial or missing component has a documented reason and data impact (D / J).	☒ Complete ☐ Partial ☐ No ☐ N/A	Equipment unavailability, timing departure and data impact recorded in J1 / DEV-013.
Required referral, safety review or follow-up action was completed or assigned.	☒ Complete ☐ Partial ☐ No ☐ N/A	Imaging recovered 26 Sep; deviation documentation and final review completed 30 Sep.

J Visit Exception and Response

Use only for a visit-level exception requiring a response. Link the component or control point, document the cause and participant/data impact, and identify the action, owner and due date. Refer safety assessment or formal deviations to their controlled records.

Component / Signal / Cause	Participant / Data Impact and Response	Source / Safety / Deviation Link	Owner	Due Date	Status
D2: radiographs two days late; unit unavailable 23 Sep.	Alternate unit used 26 Sep; no new clinical finding. CtQ timing not met; recovery does not remove the departure.	DEV-NB014-2026-013; IMG-D30 / IQL-014; FUCR-2026-Q3	Laura Gomez / Site QA; Elena Martin / Imaging Lead	26 Sep 2026; recovered 26 Sep	☐ Open ☒ Closed
Not used	N/A	N/A	N/A	N/A	☐ Open ☐ Closed
Not used	N/A	N/A	N/A	N/A	☐ Open ☐ Closed
Not used	N/A	N/A	N/A	N/A	☐ Open ☐ Closed

PFVR — PARTICIPANT FOLLOW-UP VISIT RECORD

v0.4 - SIMULATED

PARTICIPANT ID	PFVR RECORD ID	VISIT NUMBER / NAME
NB014-0032	PFVR-NB014-0032-D30	Day 30 follow-up

K Overall Visit Outcome

Outcome	Meaning	Select one
Compliant	Required visit activities met the applicable timing, method and completion requirements.	☐ Select
Compliant with observation	A documented observation remains; no required timing, method or completion criterion was breached.	☐ Select
Non-compliant / action required	A timing, method, completion or response requirement was not met; record the impact and action in J.	☒ Select
Not assessable	There is insufficient information to determine the visit outcome.	☐ Select

Required CtQ Completion — Method and Window

☐ Criteria met ☒ Criteria not met ☐ Pending evidence ☐ No CtQ component required by CIP

Reconcile the required CtQ components in D. Record any late or missing component and its impact even if it is subsequently recovered. Transfer component-level facts to FUCR; retain the original timing classification.

Outcome Rationale / Open Components and Follow-up

Explain the visit classification and CtQ summary, outstanding evidence and planned follow-up. For a subsequent update, add the date, reviewer and source reference without replacing the earlier assessment.

30 Sep 2026 - SC: The Day 30 visit occurred within its nominal window. All six required components are now complete using the intended methods. Radiographs were acquired on 26 Sep, Day 39, two days after the Day 37 limit. The imaging CtQ timing criterion is therefore not met; retain the visit-level non-compliant classification after recovery. The PI reviewed the imaging report on 26 Sep and found no new clinical concern. J1 records the equipment issue and recovery; DEV-NB014-2026-013 retains the departure and assessment. No component or visit-specific action remains open at this final review. FUCR receives a timely visit, complete-but-late imaging, and unmet CtQ completion criteria; no retrospective window change. Source IDs ending D30 above refer to participant NB014-0032.

L Review and Sign-off

Completed by / Role		Reviewed by / Role	
Name	Laura Gomez	Name	Dr Sofia Chen
Role	Site QA Coordinator	Role	Principal Investigator
Signature	LG - simulated	Signature	SC - simulated
Date	Entry 23 Sep; updated 30 Sep 2026	Date	30 Sep 2026

Record linkage: If this visit is later included in an aggregate Follow-up Compliance Review, retain the participant and visit identifiers needed for traceability while protecting confidentiality.
