POT - PI Oversight Template

Part 1 - Oversight plan

POT · v1.1

Study / protocol	Site / code	POT plan ID	Plan revision
PI (name)	**Effective date**	**Linked CCDM record ID / revision**	**Linked RACI record ID / revision**
Plan prepared by / role		**Controlled location of the plan and review records**	

A Purpose and use

The POT is the PI's plan for overseeing the investigation at the site and the record of every oversight review held under that plan. It settles three things before the first participant: which decisions the PI takes personally, which events must reach the PI at once, and how often the PI reviews the site's quality records and with whom. Each review then leaves a written decision on every record read, so the site can show later how the PI exercised oversight.

The POT records decisions and where each action was sent. It does not repeat the content of the records it reads, and it does not follow actions to their end: each action is followed up in the record that receives it.

	Part 1 · Oversight plan	Part 2 · Review record
Sections	A to E	I to III
Completed	Once, before the first participant. Revised only for a reason in Section E.	At every scheduled review and at every review opened by a Section C event. A new copy each time.
By	Plan owner or study coordinator; approved by the PI.	The PI, with the attendees named in Section I.
Reads	CCDM and RACI.	SART, SCML, CSST, SLCT, PIR, FUCR, IMC, CAPA, SRR and escalations received.

Each action goes to the record that owns it: corrective action to the CAPA, and gaps that affect a milestone to the next MRL review.

B1 Judgments reserved for the PI

Mark when the PI acts on each point (**Before** the step, **At decision**, or **After**, by reviewing the record) and the record that shows it. Add the site's own points in the empty lines.

Decision or point	CCDM task ID (if any)	When the PI acts	Evidence of PI involvement (record)
Surgical appropriateness and borderline eligibility		☐ Before ☐ At decision ☐ After	
Interpretation of intraoperative deviations and component substitutions		☐ Before ☐ At decision ☐ After	
Relation of a complication to the device or the procedure		☐ Before ☐ At decision ☐ After	
Early signs of executional drift across cases		☐ Before ☐ At decision ☐ After	
		☐ Before ☐ At decision ☐ After	
		☐ Before ☐ At decision ☐ After	
		☐ Before ☐ At decision ☐ After	
		☐ Before ☐ At decision ☐ After	
		☐ Before ☐ At decision ☐ After	
		☐ Before ☐ At decision ☐ After	
		☐ Before ☐ At decision ☐ After

Study / site	POT plan ID / revision	Linked CCDM record ID / revision	Sheet number / total sheets

B2 CCDM tasks retained by the PI or under active PI review

Copy from the CCDM every task coded C1 (supervision S0) or reviewed at level S1, and mark when the PI acts on each.

CCDM task ID	Task or decision (as in the CCDM)	Code / supervision	When the PI acts	Evidence of PI involvement (record)
			☐ Before ☐ At decision ☐ After	
			☐ Before ☐ At decision ☐ After	
			☐ Before ☐ At decision ☐ After	
			☐ Before ☐ At decision ☐ After	
			☐ Before ☐ At decision ☐ After	
			☐ Before ☐ At decision ☐ After

C Event-triggered escalation pathway

These events reach the PI at once, whatever the review schedule. Add the study's own triggers in the empty line and keep the same list in the escalation column of the CCDM.

No.	Trigger event	Who notifies (Role ID)	PI notified within	Immediate action	Record
1	**Surgery by a surgeon who has not been released (SCR or TRE)**				
2	**Missing implant lot number or UDI record**				
3	**Unplanned component substitution**				
4	**Substantial uncertainty about eligibility**				
5	**Delayed SAE reporting**				
6	**Missed critical imaging window**				
7	**Major PD affecting endpoint integrity**				
8	**Revision, explant, reoperation or readmission**				
9	**Serious adverse event, serious adverse device effect, or a device deficiency that could have led to one**				
10					

If more triggers are needed, reprint this sheet, number it and continue the numbering.

D Review cycle and meeting architecture

For each setting, name who attends by Role ID, how often it meets, which records it reads and where its record is kept. The scheduled review is the one recorded in Part 2.

Setting	Participants (Role IDs)	Cadence / when	Sources read	Record
Weekly operational huddle				
Scheduled oversight review (the POT review cycle)				
Case-triggered review				

The PI sets the interval of the scheduled review: shorter when many participants are active, longer when few are. Huddles need no POT record. Hold an earlier review after a serious adverse device effect, a cluster of complications, a protocol amendment or the departure of a key person.

If the PI also operates on study participants: decisions on the PI's own authorization and performance are taken by (Role ID, or a party outside the site), agreed before the first case:

E Plan approval and revision

Reason for this revision

- ☐ Initial plan
- ☐ CCDM revision
- ☐ RACI change (functions or holders)
- ☐ New trigger or event
- ☐ MRL milestone finding
- ☐ CAPA
- ☐ Sponsor or CIP change
- ☐ Other

Supersedes (plan ID / revision) and summary of change:

Part 2 - Oversight review record

POT · v1.1

POT plan ID / revision	Review ID	Review date	Sheet number / total sheets

I Review identification

Review type	Period covered	Attendees (Role IDs)	Previous review ID
☐ Scheduled review ☐ Triggered review (Section C no. ___) ☐ Case-triggered review			

II Cycle sources and PI decision

Read every record listed and mark one decision per line. **Monitor**: check again at the next review. **Action routed**: write the ID of the record that received the action. **Escalated**: the matter needs a decision outside the site, or a Hold in Section III.

Source	Version or period read	Signal since last review	PI interpretation	Decision	Destination record and ID
1 · SART Open safety cases and reporting status		☐ Yes ☐ No		☐ No signal ☐ Monitor ☐ Action routed ☐ Escalated	
2 · SCML and CSST New complications; signals by category, component and surgeon		☐ Yes ☐ No		☐ No signal ☐ Monitor ☐ Action routed ☐ Escalated	
3 · SLCT Each surgeon's recent cases, read after the complications		☐ Yes ☐ No		☐ No signal ☐ Monitor ☐ Action routed ☐ Escalated	
4 · PIR Indicator status against its rules		☐ Yes ☐ No		☐ No signal ☐ Monitor ☐ Action routed ☐ Escalated	
5 · FUCR Visits in window and missing components		☐ Yes ☐ No		☐ No signal ☐ Monitor ☐ Action routed ☐ Escalated	
6 · IMC Findings of internal monitoring		☐ Yes ☐ No		☐ No signal ☐ Monitor ☐ Action routed ☐ Escalated	
7 · CAPA Open actions and effectiveness reviews due		☐ Yes ☐ No		☐ No signal ☐ Monitor ☐ Action routed ☐ Escalated	
8 · SRR New risks and triggers met since the last review		☐ Yes ☐ No		☐ No signal ☐ Monitor ☐ Action routed ☐ Escalated	
9 · Escalations received From the CCDM, SCR, RACI or another route		☐ Yes ☐ No		☐ No signal ☐ Monitor ☐ Action routed ☐ Escalated	
10		☐ Yes ☐ No		☐ No signal ☐ Monitor ☐ Action routed ☐ Escalated	

POT - PI Oversight Template

Part 2 - Oversight review record

III PI conclusion and sign-off

☐ No action needed	☐ Actions routed	☐ Escalated to the sponsor	☐ Hold
No source showed a signal that needs a route.	Actions sent to their owning records (Section II).	A matter needs the sponsor's decision or reporting route.	Inclusion or surgery paused until the matter is resolved.

Mark the most restrictive decision that applies across Section II. Write in "Rationale" why, and carry anything not settled today to the next review.
