CAPA - Corrective and Preventive Action Log

Log identification, purpose and classifications

SIMULATED · v1.0

Study / protocol	Site / code	CAPA log ID	Review period / cut-off
GLENOS-01 / GS-2026-01	Riverside Orthopedic Center / 014	CAPA-LOG-014 / review 2	1 Aug to 5 Nov 2026 / 5 Nov 2026
Review type ☒ Periodic ☐ Triggered ☐ Close-out	**Authoritative CAPA source (QMS extract)** Hospital QMS extract QMS-014-1105	**Log owner / role** Maria Silva / Study Coordinator	**Previous review** CAPA-LOG-014 review 1 (31 Jul 2026)

A Purpose and use

The CAPA log lists every corrective and preventive action (CAPA) of the site in one review period and reads them together: whether the list matches the authoritative CAPA source (D), where they concentrate (D), whether separate CAPAs share a cause (E), which ones are still active (F) and whether closed ones worked (G). Each CAPA keeps its own investigation and plan in its own record; the log cites them and does not repeat them.

Unit of analysis	Decision supported	Inputs	Outputs
The site's CAPAs for one period, one line each.	Whether the portfolio is under control, which CAPAs need follow-up, closure or reopening, and whether a pattern needs escalation.	CAPA records, the deviation, IMC, PIR, CSST and SRR records that raised them.	Distribution, patterns, follow-up and effectiveness; updates to the SRR, PIR and POT.

B Classifications

One category, one criticality and the status from the authoritative source for each CAPA.

Category

No.	Category	Use when the main problem is
1	**Participant rights and consent**	Consent, confidentiality, participant rights
2	**Protocol and procedure**	A CIP requirement or procedure step not followed
3	**Safety and device**	Safety reporting, device deficiency, accountability
4	**Endpoint, imaging and assessment**	Image, score or measurement quality
5	**Follow-up and retention**	Visit timing, completeness, recovery
6	**Data and documentation**	Source, CRF, queries, filing
7	**Training and delegation**	Training, release, delegation, supervision
8	**Oversight and governance**	PI oversight, review, escalation
9	**Systems and suppliers**	Equipment, supplier, loaner sets, facilities

Criticality

Criticality	Use when
High	Can harm a participant, the device evidence or an endpoint; PI review now
Medium	Repeats or affects several records; PI review at the next review
Low	Isolated, no effect on safety or endpoints

Status

Status	Meaning
Open	Analysis or plan pending
In progress	Actions being carried out
Effect pending	Actions done; effect not yet shown
Closed: effective	Check met
Closed with limit	Limit and residual risk accepted by the PI
Reopened	Problem came back; same ID

CAPA - Corrective and Preventive Action Log

CAPA register

SIMULATED · v1.0

CAPA log ID	Site / code	Review period / cut-off	Sheet no. / total sheets
CAPA-LOG-014 / review 2	Riverside / 014	1 Aug to 5 Nov 2026	1 of 1

C CAPA register

One line per CAPA in the period: New (opened in the period), Carried (active at the start) or Reopened. A reopened CAPA keeps its ID. Problem in one factual sentence; the content stays in the CAPA record.

CAPA ID	Opened · closed	Basis	Problem (one sentence)	Raised by (record)	Category no.	Criticality	Status	Owner
CAPA-014-01	20 Jul · 30 Sep	☐ New ☐ Carried ☒ Reopened	Study tasks done before release on the delegation log	IMC-014-01; reopened by IMC-014-02	7	☐ High ☒ Medium ☐ Low	Reopened	Coordinator
CAPA-014-02	26 Aug · 31 Oct	☒ New ☐ Carried ☐ Reopened	Image sets taken late at the 2-week visit	IQL-014 review, Aug	4	☐ High ☐ Medium ☒ Low	Closed: effective	Radiology tech
CAPA-014-03	22 Oct · open	☒ New ☐ Carried ☐ Reopened	Constant scores transcribed wrongly into the CRF	IMC-014-02, check 9	6	☐ High ☒ Medium ☐ Low	In progress	Coordinator
CAPA-014-04	5 Nov · open	☒ New ☐ Carried ☐ Reopened	Loaner sets reach theatre without trial liners	PIR-014-2026-10, E-1	9	☒ High ☐ Medium ☐ Low	Open	OR nurse lead
		☐ New ☐ Carried ☐ Reopened				☐ High ☐ Medium ☐ Low		
		☐ New ☐ Carried ☐ Reopened				☐ High ☐ Medium ☐ Low		
		☐ New ☐ Carried ☐ Reopened				☐ High ☐ Medium ☐ Low		
		☐ New ☐ Carried ☐ Reopened				☐ High ☐ Medium ☐ Low		
		☐ New ☐ Carried ☐ Reopened				☐ High ☐ Medium ☐ Low		
		☐ New ☐ Carried ☐ Reopened				☐ High ☐ Medium ☐ Low		

CAPA - Corrective and Preventive Action Log

Reconciliation and distribution

SIMULATED · v1.0

CAPA log ID	Site / code	Review period / cut-off	Previous review
CAPA-LOG-014 / review 2	Riverside / 014	1 Aug to 5 Nov 2026	Review 1, 31 Jul 2026

D Reconciliation and distribution

Check the register against the authoritative source before counting. Count each CAPA once.

Reconciliation

Check	Result	Source extract · correction
Every CAPA in the authoritative source for the period is in the register	☒ Yes ☐ No	QMS-014-1105: 4 CAPAs
No CAPA in the register is missing from the source	☒ Yes ☐ No	
No duplicate CAPA ID	☒ Yes ☐ No	
Status in the register matches the source	☐ Yes ☒ No	CAPA-014-02 shown as open in the QMS; closed 31 Oct, QMS corrected 6 Nov

Distribution by category and criticality

Category	High	Medium	Low	Total	CAPA IDs
1 · Participant rights and consent				0	
2 · Protocol and procedure				0	
3 · Safety and device				0	
4 · Endpoint, imaging and assessment			1	1	CAPA-014-02
5 · Follow-up and retention				0	
6 · Data and documentation		1		1	CAPA-014-03
7 · Training and delegation		1		1	CAPA-014-01
8 · Oversight and governance				0	
9 · Systems and suppliers	1			1	CAPA-014-04
Total	1	2	1	4	

CAPA - Corrective and Preventive Action Log

Patterns across CAPAs

SIMULATED · v1.0

CAPA log ID	Site / code	Review period / cut-off	Sheet no. / total sheets
CAPA-LOG-014 / review 2	Riverside / 014	1 Aug to 5 Nov 2026	1 of 1

E Patterns across CAPAs

Look for CAPAs that share a cause, a process step, a person, a supplier or a period, and compare with earlier reviews. Cite the CAPA records; do not repeat their investigation. Reprint this sheet if more rows are needed.

#	Pattern seen	CAPA IDs	What was compared (records and counts)	Shared cause?	Decision · route
1	Two CAPAs come from a check made against a list that was incomplete: the delegation log (01) and the loaner-set check sheet (04)	01, 04	Both checks were done and signed; the list itself missed the item (new surgeon, trial liners). Review 1: 0 such CAPAs	☒ Supported ☐ Not supported ☐ Open	SRR: new risk "checklist content not reviewed"; PIR indicator 2
2	Transcription errors appear in the weeks the research nurse was away	03	CAPA-014-03 and FUCR-014-2026-10: same 1 to 14 Oct window	☒ Supported ☐ Not supported ☐ Open	SRR R-13 (cover plan)
3	Imaging delays	02	One CAPA, closed effective; no repeat in Sep and Oct	☐ Supported ☒ Not supported ☐ Open	None
4				☐ Supported ☐ Not supported ☐ Open	
5				☐ Supported ☐ Not supported ☐ Open	
6				☐ Supported ☐ Not supported ☐ Open	

CAPA - Corrective and Preventive Action Log

Active CAPAs

SIMULATED · v1.0

CAPA log ID	Site / code	Review period / cut-off	Sheet no. / total sheets
CAPA-LOG-014 / review 2	Riverside / 014	1 Aug to 5 Nov 2026	1 of 1

F Active CAPAs

One line per CAPA still open, in progress, effect pending or reopened (status as in C). The plan stays in the CAPA record. Reprint this sheet if more rows are needed.

CAPA ID	Next step	Owner	Due	Evidence expected or missing	Escalation
CAPA-014-01	Check TRE release before a name goes on the task roster; audit 10 tasks	Coordinator	30 Nov	Roster check sheet; audit result	POT-014-07
CAPA-014-03	Second check of every endpoint entry since August	Coordinator	15 Nov	Second-check log	None
CAPA-014-04	Root cause with the sponsor; trial liners on the check sheet	OR nurse lead	15 Nov	Revised check sheet LS-07 rev. 2	PI (high criticality)

CAPA - Corrective and Preventive Action Log

Effectiveness and closure

SIMULATED · v1.0

CAPA log ID	Site / code	Review period / cut-off	Previous review
CAPA-LOG-014 / review 2	Riverside / 014	1 Aug to 5 Nov 2026	Review 1, 31 Jul 2026

G Effectiveness, closure and reopening

Use the check set in each CAPA. Done is not the same as effective; a closure with a limit needs the residual risk accepted by the PI.

CAPA ID	Check set in the CAPA	Period checked	Evidence and result	Decision	Limit · residual risk · evaluator
CAPA-014-02	No late 2-week image set for two months	Sep and Oct	IQL: 0 late sets of 9	☒ Close: effective ☐ Close with limit ☐ Keep open ☐ Reopen	None · M. Silva, 31 Oct
CAPA-014-01	No study task before release for three months	Aug to Oct	IMC-014-02: 4 tasks by S-03 before release (Oct)	☐ Close: effective ☐ Close with limit ☐ Keep open ☒ Reopen	Earlier closure (30 Sep) was too early · M. Silva
				☐ Close: effective ☐ Close with limit ☐ Keep open ☐ Reopen	
				☐ Close: effective ☐ Close with limit ☐ Keep open ☐ Reopen	
				☐ Close: effective ☐ Close with limit ☐ Keep open ☐ Reopen	

CAPA - Corrective and Preventive Action Log

Outputs and conclusion

SIMULATED · v1.0

CAPA log ID	Site / code	Review period / cut-off	Previous review
CAPA-LOG-014 / review 2	Riverside / 014	1 Aug to 5 Nov 2026	Review 1, 31 Jul 2026

H Outputs and conclusion

Only outputs created by this review; the receiving record keeps the content.

Output or update	From (CAPA or pattern)	Sent to (record)	Confirmed (date)
New risk: checklist content not reviewed when people or kits change	Pattern E-1	SRR-014 v4	7 Nov
Cover plan for research nurse absence	Pattern E-2	SRR R-13	7 Nov
CAPA-014-04 reviewed by the PI	CAPA-014-04	POT-014-08	6 Nov

Portfolio	☐ Under control ☒ Under control with open CAPAs ☐ Not under control: escalation
Active CAPAs (number) · high criticality (IDs)	3 · high: CAPA-014-04
Rationale and residual risk	Four CAPAs, all reconciled with the QMS. One closed effective; one reopened because the first closure came before its check could show anything. Two CAPAs share the same weakness: the checks were done, but against lists nobody reviewed when people or kits changed. Residual risk stays until CAPA-014-04 is effective; the PI reviews it in POT-014-08.
Next review	Review 3, 5 Feb 2027; earlier if CAPA-014-04 slips
