FUCR - Follow-up Compliance Review

Review identification, purpose and measures

SIMULATED · v0.9

Study / protocol GLENOS-01 / GS-2026-01	**CIP version** CIP v4.2	**Site / code** Riverside Orthopedic Center / 014	**FUCR ID** FUCR-014-2026-10
Period reviewed / data cut-off 1 to 31 Oct 2026 / 31 Oct 2026	**Previous FUCR** FUCR-014-2026-09	**Review type** ☒ Routine ☐ Intensified ☐ Triggered	**Review date** 3 Nov 2026
Participants due (n) · visits expected (n) 7 · 7 this period; 17 to date	**PFVRs used (IDs or range)** PFVR-014-001-W2 to PFVR-014-007-W2; none for the missed 6-week visit of 014-006		**Document owner / role** Nadia Costa / Research nurse

A Purpose and use

The FUCR reads follow-up across all participants and visits, using the Participant Follow-up Visit Records (PFVR) without reopening them. It gives the four follow-up measures against the rule (B), maps every visit to date (C), shows which components fail at which time point (D) and how far visits drift from target (E), and looks for where problems concentrate and why (F). Its result feeds indicator 3 of the Performance Indicator Record (PIR).

Unit of analysis	Decision supported	Inputs	Outputs
One site and one period, read against all visits to date.	Whether follow-up is under control, where problems sit and whether they share a cause.	PFVRs, CIP visit schedule, outreach records, the PIR rule sheet.	Measures for the PIR; causes and actions with their check.

B Follow-up measures

Count from the PFVRs as n / N (%). Example targets: at least 90% for measures 1-2; at most 5% for 3-4. Round required completions up and allowed losses down. Review every shortfall; recurrence or endpoint loss requires action. N=0 is not assessable.

Measure	This period n / N (%)	Previous period n / N (%)	Rule limit	Decision
1 · Visits completed within their window N = expected visits	6 / 7 (86%)	7 / 7 (100%)	N=1-9: 100% N=10-19: (N-1)/N N=20-29: (N-2)/N N >=30: ceil(0.90N)/N Examples: 9/10=90%; 23/25=92% This N=7: 7/7 (100%)	☐ Within rule ☒ Closer review ☐ Action required
2 · Visits with every required component N = completed visits	5 / 6 (83%)	6 / 7 (86%)	N=1-9: 100% N=10-19: (N-1)/N N=20-29: (N-2)/N N >=30: ceil(0.90N)/N Examples: 9/10=90%; 23/25=92% This N=6: 6/6 (100%)	☐ Within rule ☐ Closer review ☒ Action required
3 · Visits missing an endpoint component N = completed visits	1 / 6 (17%)	1 / 7 (14%)	N=1-19: 0 (0%) N=20-39: at most 1/N N >=40: floor(0.05N)/N Examples: N=5 or 10: 0%; 1/25=4% This N=6: 0/6 (0%)	☐ Within rule ☐ Closer review ☒ Action required
4 · Participants not seen despite documented efforts N = participants due	1 / 7 (14%)	0 / 7 (0%)	N=1-19: 0 (0%) N=20-39: at most 1/N N >=40: floor(0.05N)/N Examples: N=5 or 10: 0%; 1/25=4% This N=7: 0/7 (0%)	☐ Within rule ☒ Closer review ☐ Action required

FUCR - Follow-up Compliance Review

Visit map

SIMULATED · v0.9

FUCR ID	Site / code	Period / data cut-off	Sheet no. / total sheets
FUCR-014-2026-10	Riverside / 014	Oct 2026 / 31 Oct	1 of 1

C Visit map

One line per participant, every visit to date. Write in each cell: Complete, Late, Incomplete, Missed or Not due. A column or a line with several problems shows where they sit. Reprint this sheet for more participants, numbering the sheets.

Participant	2 weeks	6 weeks	3 months	6 months	12 months	24 months
014-001	Complete	Complete	Complete	Not due		
014-002	Complete	Complete	Complete	Not due		
014-003	Complete	Complete	Incomplete	Not due		
014-004	Complete	Late	Complete	Not due		
014-005	Complete	Complete	Not due			
014-006	Complete	Missed	Not due			
014-007	Complete	Not due				

D Components by time point

For visits to date, write complete / expected for each component at each time point; a missed visit counts as missing for every component. Not required where the CIP does not ask for it.

Component	2 weeks	6 weeks	3 months	6 months	12 months	24 months
Imaging	7 / 7	5 / 6	4 / 4			
Clinical scores	Not required	5 / 6	4 / 4			
Participant questionnaires	7 / 7	5 / 6	3 / 4			
Examination and range of motion	7 / 7	5 / 6	4 / 4			
Interval safety review	7 / 7	5 / 6	4 / 4			

E Distance from target by time point

From the PFVRs: days between the target date and the visit. A drift towards the window edge warns before visits fall outside it.

Time point	Visits done	Median days from target	Range (earliest, latest)	Outside window	Window (CIP)
2 weeks	7	+1	-2, +4	0	± 4 days
6 weeks	5	+3	0, +9	1 (014-004, +9)	± 7 days
3 months	4	-3	-4, +1	0	± 14 days
6 months	0				± 30 days
12 months	0				± 30 days
24 months	0				± 30 days

F Causes and where they concentrate

One main cause per problem, from the PFVR. Look for the person, weeks, component or time point where the problems gather, and compare the problem count there with the rest.

Cause	Count	Measures affected (#)	Attribution	Where it concentrates	There vs elsewhere (n / N)	PFVRs
Participant availability	2	1, 4	☐ Site ☒ Participant ☐ Protocol ☐ Mixed	014-006 (abroad); 014-004 (holiday)	6-week visits: 2 / 6 vs other visits 0 / 11	PFVR-014-004-W6; outreach log OL-014-006
Scheduling			☐ Site ☐ Participant ☐ Protocol ☐ Mixed			
Staffing or absence	2	2, 3	☒ Site ☐ Participant ☐ Protocol ☐ Mixed	Weeks the research nurse was away (Aug; 1 to 14 Oct)	2 / 4 vs 1 / 13	PFVR-014-003-M3; PFVR-014-002-M3
Imaging			☐ Site ☐ Participant ☐ Protocol ☐ Mixed			
Assessment not done correctly			☐ Site ☐ Participant ☐ Protocol ☐ Mixed			
Protocol design			☐ Site ☐ Participant ☐ Protocol ☐ Mixed			

FUCR - Follow-up Compliance Review

Actions and conclusion

SIMULATED · v0.9

G Actions and earlier actions

One action per cause found in F, with the check that will show it worked; then the actions from earlier reviews.

Action	What will change (cause in F)	Receiving record	Owner	Due	How we will know it worked
FUCR-A1	Named backup for questionnaires and data entry during absence	SRR R-13; PIR-A2	Coordinator	30 Nov	No incomplete questionnaire in Nov and Dec; repeat the test in F
FUCR-A2	Ask about travel at consent and book visits around it	Consent checklist	Research nurse	15 Nov	No visit missed for travel in the next 3 months

Earlier action	Check set when assigned	What this period shows	Result
FUCR-09-A1	Reminder call 3 days before each visit: no visit late for scheduling	Oct: 0 late for scheduling (E)	☒ Worked ☐ Did not work ☐ Too early
			☐ Worked ☐ Did not work ☐ Too early

H Conclusion

Follow-up in this period	☐ Under control ☐ Watch next period ☒ Action required ☐ Escalation required
Basis (measures, map, causes)	Two measures need action. The map puts the problems on two participants (014-003, 014-006) and the 6-week column, where visits also drift late (median +3 days). Two causes: participants away at the 6-week visit, and the questionnaires missed while the research nurse was away (2 of 4 visits in those weeks, 1 of 13 otherwise). PIR indicator 3: 5 of 7 this period.
Sent to (PIR indicator 3, IMC, CAPA, SRR, POT)	PIR-014-2026-10, indicator 3; SRR R-13
Next review	FUCR-014-2026-11, 3 Dec 2026
