PFVR - Participant Follow-up Visit Record

Visit identification, purpose, components and timing

Study / protocol	CIP version	Site / code	PFVR ID
Participant code	**Visit (name / nominal day)**	**Index procedure date (ICDL ID)**	**Controlled location**

A Purpose and use

The PFVR records one participant's one follow-up visit: when it happened (C), each component the CIP requires with its date, completion and timing (D), whether images and tests are usable (E), what the participant reports (F), the clinical assessment (G) and who did it (H). Problems that need a response go to I, and the visit is classified in J.

A component done on a later contact for the same visit stays in this record with its own date. Write the short finding that matters and cite the clinical source, the Image Quality Log (IQL) or the SART for the rest.

Unit of analysis	Decision supported	Inputs	Outputs
One participant and one follow-up visit of the CIP.	Whether the visit is complete and usable, usable with a limit, or needs follow-up.	CIP visit schedule, clinical source, questionnaires, IQL, earlier PFVR.	Visit outcome (J) and component counts for the Follow-up Compliance Review (FUCR); exceptions and routes (I).

B Applicable visit component guide

The CIP visit schedule defines the components; tick the families and examples that apply to this visit, then list each one in D.

Component family	Examples that may apply	Recorded in
Imaging and objective tests	☐ X-ray ☐ CT ☐ MRI ☐ Ultrasound ☐ Laboratory ☐ Other test	D: done, date, window · E: usable?
Participant-reported outcomes	☐ Pain ☐ Function ☐ Instability ☐ Swelling ☐ New symptom ☐ Satisfaction	D: each instrument · F: change reported
Clinical and functional assessment	☐ Examination ☐ Range of motion ☐ Strength ☐ Stability ☐ Wound ☐ Functional score	D: done · G: result
Care and safety review	☐ Physiotherapy ☐ Medication review ☐ Safety review ☐ Referral	D: done · I: response · SART if an event

C Visit timing and contacts

This section records when the visit happened. Whether it is complete and usable is decided in J from D and E.

Nominal target date (reference event)	Window: first and last day (CIP rule)	Actual visit date	Days from target

Contact	Date · mode	Day from index	Components done (# in D)	Purpose · source reference
First				
Return				
Return				

Reason for delay, missed contact efforts or reschedule	

PFVR - Participant Follow-up Visit Record

Required components

PFVR ID	Participant code	Visit	Window	Sheet no. / total sheets

D Required components

One line per component the CIP requires for this visit, taken from the visit schedule. Completion and timing are rated separately: a component can be complete but outside its window. Partial, not performed or outside the window needs an exception in I.

#	Component	Critical to quality?	Method required · used	Date · day from index	Completion	Timing	Evidence or record (IQL, questionnaire, note)	Exception (# in I)
1		☐ Yes ☐ No			☐ Complete ☐ Partial ☐ Not performed ☐ N/A	☐ In window ☐ Outside window ☐ N/A		
2		☐ Yes ☐ No			☐ Complete ☐ Partial ☐ Not performed ☐ N/A	☐ In window ☐ Outside window ☐ N/A		
3		☐ Yes ☐ No			☐ Complete ☐ Partial ☐ Not performed ☐ N/A	☐ In window ☐ Outside window ☐ N/A		
4		☐ Yes ☐ No			☐ Complete ☐ Partial ☐ Not performed ☐ N/A	☐ In window ☐ Outside window ☐ N/A		
5		☐ Yes ☐ No			☐ Complete ☐ Partial ☐ Not performed ☐ N/A	☐ In window ☐ Outside window ☐ N/A		
6		☐ Yes ☐ No			☐ Complete ☐ Partial ☐ Not performed ☐ N/A	☐ In window ☐ Outside window ☐ N/A		
7		☐ Yes ☐ No			☐ Complete ☐ Partial ☐ Not performed ☐ N/A	☐ In window ☐ Outside window ☐ N/A		
8		☐ Yes ☐ No			☐ Complete ☐ Partial ☐ Not performed ☐ N/A	☐ In window ☐ Outside window ☐ N/A		

PFVR - Participant Follow-up Visit Record

Image and test usability, participant report

PFVR ID	Participant code	Visit	Window

E Images and objective tests

Only for components in D that produce an image or a test result. The image-set quality itself is judged in the IQL.

# in D	Record (IQL or test ID)	Usable?	Reviewer · date	Finding that matters for the visit	Action or route
		☐ Adequate ☐ Limited ☐ Unavailable			
		☐ Adequate ☐ Limited ☐ Unavailable			
		☐ Adequate ☐ Limited ☐ Unavailable			

F What the participant reports

The participant's own words, including improvement. A report is not classified as an adverse event here; send it for assessment when needed.

Reported change or concern	Onset · severity	Since last visit	Action or referral · record
		☐ Better ☐ Worse ☐ Same	
		☐ Better ☐ Worse ☐ Same	
		☐ Better ☐ Worse ☐ Same	
		☐ Better ☐ Worse ☐ Same	

PFVR - Participant Follow-up Visit Record

Clinical assessment, personnel and exceptions

PFVR · v0.7

PFVR ID	Participant code	Visit	Window

G Clinical assessment

The result and how it compares with the last visit; the full note stays in the clinical source.

Assessment	Assessor	Method	Result · compared with last visit	Action · record

H Who did the assessments

A change of person matters when a measure depends on the assessor; note the handover.

Role	Name	Same as last visit?	Handover or supervision note
Imaging		☐ Yes ☐ No ☐ N/A	
Clinical assessor		☐ Yes ☐ No ☐ N/A	
Questionnaires and scores		☐ Yes ☐ No ☐ N/A	

I Exceptions and response

Only for a problem that needs a response: a partial, missing or late component, an unusable result, or a finding that needs a referral. Safety and deviation assessments stay in their own records.

#	Component (# in D) · cause	Effect on the participant or the data · response	Linked record	Owner	Due	Status
1						☐ Open ☐ Closed
2						☐ Open ☐ Closed
3						☐ Open ☐ Closed

PFVR - Participant Follow-up Visit Record

Visit outcome and sign-off

PFVR ID	Participant code	Visit	Window

J Visit outcome

Write what confirms each point (counts, days, item numbers). The classification comes from C to I; an exception does not make a visit unusable by itself.

Point	Result	Confirmed in (section and what was checked)
Visit in its window	☐ Yes ☐ No	
Every required component complete	☐ Yes ☐ No	
Every critical-to-quality component in window and usable	☐ Yes ☐ No	
No open exception	☐ Yes ☐ No	

Outcome	Meaning	Select
Complete and usable	All components complete, in window and usable.	☐
Complete, with a documented observation	Complete and usable; an observation in I does not limit the data.	☐
Usable with a limitation	A component is late, partial or limited; the limit is stated in I.	☐
Incomplete: follow-up required	A component is still missing and can be recovered.	☐
Not usable for the intended assessment	A critical-to-quality component cannot be used.	☐
Missed	The visit did not take place.	☐
