RACI - Responsibility Assignment Matrix

Who takes each CCDM task, and who owns each quality function

RACI · v0.3

Study / protocol	Site / code	RACI record ID	Record revision
Linked CCDM record ID / revision	**Linked DTRM record ID / version**	**Effective date**	**Supersedes (record ID / revision)**
RACI owner / role		**Site type (scalability model)** ☐ Type A ☐ Type B ☐ Type C	

A Purpose and use

Read with the CCDM, the RACI is the site's **delegation log**: the CCDM sets how critical each task is and how much supervision it needs, and the RACI names the function and the person who take it. A C2 or C3 task goes only to a person with a current TRE release for that task.

Approve it at start-up, before the first participant. Afterwards, record changes of holder or backup in Section I and revise the matrix when the CCDM or the DTRM changes.

Element	Content	Record / link
Unit of analysis	One RACI for one site, one investigation and one revision: one row per CCDM task in Section D, one line per holder or backup in Section C.	RACI record ID and revision; linked CCDM and DTRM revisions.
Decision supported	Who is R, A, C and I for each CCDM task, who holds and backs up each function, and who owns each instrument in use.	Sections C, D and E.
Inputs	The CCDM task list, the DTRM role profiles, and each person's TRE release (with the SCR decision for surgical tasks).	CCDM record ID / revision; DTRM record ID; TRE record IDs.
Outputs	An ownership map that shows where coverage is complete and where it is not, closed by a coverage decision. Presented with the CCDM as the current delegation log at monitoring visits and consulted before each surgical case. Gaps go to the POT, the SRR or the CAPA.	Section G decision; Section H approval; Section I change log.

B Codes and assignment rules

R Responsible	A Accountable	C Consulted	I Informed	A/R Same function
Performs the task, or its defined part, within the CCDM boundary and supervision.	Answers for the task at site level and signs off its result. One A per task.	Gives clinical, technical or procedural input before the task is completed or decided.	Is told of the result or decision after it is made.	Answers for and performs the task. Required for C1 tasks; elsewhere only with a compensating review (Section G).

CCDM code	Who may be R	Who is A	Release checked before an R is entered
C1 PI-retained	PI only; other functions only C or I	PI (enter A/R)	PI training current in the TRE; no backup
C2 Delegable within a boundary	A function whose holder and backup are released for the task	PI or a named function	TRE release for the task ID; for surgical tasks, also the SCR decision (TRE Section B)
C3 Routine	A function whose holder and backup are released for the task	PI or a named function	TRE release for the task ID

Supervision level	What the R may do	Review	Allowed with
S0 PI-retained	Prepare information only; no final decision	The PI decides	C1
S1 Active PI review	Perform defined steps	The PI or a named specialist reviews specified outputs at the decision point	C2
S2 Defined supervision	Perform the task after release	A named supervisor, with stated restrictions and case-level escalation triggers	C2, C3
S3 Routine oversight	Perform the task independently within current instructions	Periodic review through normal quality controls	C3

Each task has one A and at least one R. The PI keeps overall responsibility for the investigation (ISO 14155:2026 Clause 10.1) whatever A is entered.

C Function and role-holder register

Enter each function the site uses, with its DTRM profile ID and authority limit: at least the PI, operating surgeon, OR staff, radiology liaison, functional assessor, study coordinator and data QA. One line for the holder and one for the backup; in a Type C center every function still has a named holder. The signature confirms acceptance of the function and its limit and is the signature specimen. After approval, record changes in Section I.

Role ID (DTRM profile)	Function and authority limit	Position	Name	Initials	TRE record ID	Also holds (Role IDs)	From	PI authorization (initials / date)	Signature (acceptance)
	PI Accountable for conduct at the site and for every delegated activity. Takes the C1 decisions. Delegation transfers execution, and responsibility stays with the PI.	Holder							
		Backup	No backup for C1 decisions. If the PI is absent, C1 decisions wait or follow the sponsor's route for a PI change; record it in Section I.

D Task assignment matrix

Task ID (CCDM)	Task	Code	Supervision	Functions: Role ID from Section C									TRE release checked	
													Holder	Backup
													☐ Yes ☐ No	☐ Yes ☐ Cond. ☐ No ☐ N/A
													☐ Yes ☐ No	☐ Yes ☐ Cond. ☐ No ☐ N/A
													☐ Yes ☐ No	☐ Yes ☐ Cond. ☐ No ☐ N/A
													☐ Yes ☐ No	☐ Yes ☐ Cond. ☐ No ☐ N/A
													☐ Yes ☐ No	☐ Yes ☐ Cond. ☐ No ☐ N/A
													☐ Yes ☐ No	☐ Yes ☐ Cond. ☐ No ☐ N/A
													☐ Yes ☐ No	☐ Yes ☐ Cond. ☐ No ☐ N/A
													☐ Yes ☐ No	☐ Yes ☐ Cond. ☐ No ☐ N/A
													☐ Yes ☐ No	☐ Yes ☐ Cond. ☐ No ☐ N/A
													☐ Yes ☐ No	☐ Yes ☐ Cond. ☐ No ☐ N/A
													☐ Yes ☐ No	☐ Yes ☐ Cond. ☐ No ☐ N/A
													☐ Yes ☐ No	☐ Yes ☐ Cond. ☐ No ☐ N/A

Copy the task ID, task, code and supervision from the current CCDM and enter R, A, C, I or A/R under the Role IDs of Section C. For the R function of each task, check the TRE of the holder and of the backup; the backup is N/A for C1 tasks. If the CCDM has more tasks, reprint this page, number each matrix sheet and include all sheets in the approved RACI.

RACI - Responsibility Assignment Matrix

Quality function ownership and external support

E Quality function ownership

One line per instrument of the framework. The owner keeps the instrument current, the backup covers when the owner is absent (the same Role ID means that function's backup holder in Section C), and the accountable function answers for it. Use Role IDs from Section C.

Instrument	In use	Owner	Backup	Accountable
Governance				
CCDM Criticality-Coded Delegation Matrix	☐ Yes ☐ No			
RACI Responsibility Assignment Matrix	☐ Yes ☐ No			
DTRM Device and Study Training Requirements Matrix	☐ Yes ☐ No

PIDLR Post-Investigation Debrief and Lessons Record	☐ Yes ☐ No			

Instruments not in use and why:

F External support and unavailable expertise

Party or organization	What it covers (task IDs or function) and its limit	Agreement or reference	Site contact (Role ID)	From	To

G Coverage and combination review

Review at approval and at each revision. Write N/A when a point needs no note. Route each point not met to the record that owns the action (POT, SRR or CAPA) and write the reference; do not open the action here.

Check	Result	Finding, restriction or routed record
Every CCDM task has one A and at least one R.	☐ Met ☐ Not met	
C1 tasks: the PI is A/R, and other functions appear only as C or I.	☐ Met ☐ Not met	
Every R on a C2 or C3 task belongs to a function whose holder has a current TRE release for that task ID; surgical tasks also have a current SCR decision (TRE Section B).	☐ Met ☐ Not met	
Every function has a named holder, and every function except the PI has a backup with a current release for its tasks (DR10).	☐ Met ☐ Not met	
Every person who holds more than one function has a compensating review, stated in the finding.	☐ Met ☐ Not met	
External support and unavailable expertise are listed in Section F, each with a site contact.	☐ Met ☐ Not met	
Every instrument in use has an owner, a backup and an accountable function (Section E).	☐ Met ☐ Not met	

Coverage decision

☐ Complete ☐ Complete with restrictions ☐ Not complete: gaps routed

Restriction or routed record:

H Approval and revision

Reason for this revision

☐ CCDM revision ☐ DTRM revision ☐ TRE release granted, made conditional or withdrawn
☐ SCR restriction or suspension ☐ CIP amendment ☐ IMC or CAPA finding on delegation
☐ MRL milestone review ☐ New function or external party ☐ Other

Summary of change:

A change of holder or backup is recorded in Section I and does not need a new revision. Revise the matrix when tasks, functions or assignments change.

Controlled location / continuation sheets:

RACI owner

Name / role:

Signature / date:

PI / accountable approver

Name / role:

Signature / date:

RACI - Responsibility Assignment Matrix

Role-holder change log / continuation sheet

Study / site	RACI record ID / revision	Effective date	Sheet number / total sheets

I Role-holder change log (continuation sheet)

After approval, record every change of holder or backup here and leave Sections C and D as approved. The current holder of a function is the latest open line for that Role ID on these sheets, or the Section C line if there is none. Check the TRE release before the PI authorizes a line.

Date	Change type	Role ID	Name	Initials	TRE record ID / release checked	From	To	Reason / linked record	PI authorization (initials / date)	Signature (acceptance)
	☐ New holder ☐ New backup ☐ Interim cover ☐ Ended									
	☐ New holder ☐ New backup ☐ Interim cover ☐ Ended									
	☐ New holder ☐ New backup ☐ Interim cover ☐ Ended									
	☐ New holder ☐ New backup ☐ Interim cover ☐ Ended									
	☐ New holder ☐ New backup ☐ Interim cover ☐ Ended									
	☐ New holder ☐ New backup ☐ Interim cover ☐ Ended									
	☐ New holder ☐ New backup ☐ Interim cover ☐ Ended									
	☐ New holder ☐ New backup ☐ Interim cover ☐ Ended									
	☐ New holder ☐ New backup ☐ Interim cover ☐ Ended									
	☐ New holder ☐ New backup ☐ Interim cover ☐ Ended									
	☐ New holder ☐ New backup ☐ Interim cover ☐ Ended									
	☐ New holder ☐ New backup ☐ Interim cover ☐ Ended									

Reprint this sheet as needed, number each sheet and file all sheets with the approved RACI. At the next revision, carry the current holders into Section C and start a new sheet.
