ICDL - Intraoperative Checklist and Device Log

Case identification, purpose and release to start

SIMULATED · v0.15

Study / protocol GLENOS-01 / GS-2026-01	**Site / code** Riverside Orthopedic Center / 014	**Participant code** 014-002	**ICDL ID** ICDL-014-002
Procedure date 8 Jul 2026	**Procedure / side** Reverse shoulder arthroplasty / right	**Operating room** OR 4	**Primary surgeon (code)** Dr Lena Ortiz (S-02)
Device / system GLENOS reverse shoulder system	**CIP and surgical technique (version)** CIP v4.2; technique GS-ST v3.1	**Accountability record location** Device accountability log DAL-014, pharmacy store	**Controlled location** ISF tab 8 (Surgery) / ICDL-014-002

A Purpose and use

The ICDL is filled in during one participant's procedure, not afterwards, because what happens in the operating room cannot be rebuilt reliably later. It records the release to start (B), the critical steps (C), the times and the case data the surgeon's learning curve record needs (D), every component used with its identifiers (E), changes to the plan (F), complications and device problems (G), the review right after surgery (H) and whether the case can be closed (I). Open actions go to J.

It does not replace the operative note, the device accountability record, safety reporting or the formal deviation record; it captures what is first known here and points to them.

Unit of analysis	Decision supported	Inputs	Outputs
One participant and one procedure.	Whether the case can be closed: critical steps, device identity, changes and immediate outcome documented or sent on.	CIP and surgical plan, surgeon release (SCR, TRE), device instructions, accountability materials.	Case entry for the SLCT; components for accountability; events to the SCML and SART; images to the IQL; deviations and CAPA.

B Release to start

All items before the first incision. A No stops the start until it is resolved or a hold is recorded.

Control	Status	Evidence or reference	Exception · hold · route
Surgeon released for this procedure (SCR) and on the delegation log	☒ Yes ☐ No ☐ N/A	SCR-014-02 release 20 Jun 2026; delegation log rev. 5	
Participant, procedure and side match the schedule and source records	☒ Yes ☐ No ☐ N/A	Time-out 08:05, theatre checklist	
Consent, eligibility (PSEAR) and pre-operative checks available	☒ Yes ☐ No ☐ N/A	PSEAR-014-003; consent v3.0	
Device system, components and instruments available and compatible	☒ Yes ☐ No ☐ N/A	Loaner set LS-07 checked 7 Jul (check sheet)	
Packaging, expiry, storage and sterile release acceptable	☒ Yes ☐ No ☐ N/A	Checked by the scrub nurse at opening	
Planning images, measurements and case materials available	☒ Yes ☐ No ☐ N/A	CT plan PLAN-014-002 on screen	

Release decision	Time	Responsible (name / role) · hold record
☒ Released ☐ Released with observation ☐ Hold	08:10	Dr L. Ortiz / Sub-investigator

ICDL - Intraoperative Checklist and Device Log

Critical steps, times and case data

SIMULATED · v0.15

ICDL ID	Participant code	Procedure date	Primary surgeon (code)
ICDL-014-002	014-002	8 Jul 2026	S-02

C Critical steps

Use the critical steps of the CIP, surgical technique or site checklist. Record any step left out, adapted, repeated or out of order. N/A needs the reason; Partial, Not performed, Not acceptable or Not assessable needs a row in F or J.

#	Critical step	Done	Evidence or reference	Result	Initials · note
1	Glenoid exposure and reaming to plan	☒ Complete ☐ Partial ☐ Not performed ☐ N/A	PLAN-014-002	☒ Acceptable ☐ Observation ☐ Not acceptable ☐ Not assessable	LO
2	Baseplate inclination and version with the guide	☒ Complete ☐ Partial ☐ Not performed ☐ N/A	Guide G-014-002	☒ Acceptable ☐ Observation ☐ Not acceptable ☐ Not assessable	LO
3	Central and peripheral screw fixation	☒ Complete ☐ Partial ☐ Not performed ☐ N/A	Screw lengths in E	☒ Acceptable ☐ Observation ☐ Not acceptable ☐ Not assessable	LO
4	Humeral cut and stem trial	☒ Complete ☐ Partial ☐ Not performed ☐ N/A	Trial stem 10	☒ Acceptable ☐ Observation ☐ Not acceptable ☐ Not assessable	LO
5	Trial reduction with trial liner and stability check	☐ Complete ☒ Partial ☐ Not performed ☐ N/A	No trial liners in the set; checked with the final liner	☐ Acceptable ☒ Observation ☐ Not acceptable ☐ Not assessable	LO · F-1

D Times and case data for the learning curve record

Duration is taken from first incision to closure. Complexity uses the levels defined for the SLCT.

Time point	Time	Condition or status	Initials
First incision	08:22		LO
Device opened / first component used	08:58	Lot labels on the sheet	AR
Final implant and configuration confirmed	10:05	Stable in all positions	LO
Closure / end of procedure	10:31	Duration 2 h 9 min	AR

Case data for the SLCT	Entry
Complexity level (source)	Level 1: primary, cuff tear arthropathy (SLCT definitions v1)
Senior support or proctoring	☒ None ☐ Planned ☐ Unplanned
SLCT entry	SLCT S-02, case 2

Components and traceability

SIMULATED · v0.15

ICDL ID	Participant code	Procedure date	Primary surgeon (code)
ICDL-014-002	014-002	8 Jul 2026	S-02

E Components used and traceability

Every component used, including trials, replacements, explanted or discarded ones. Copy identifiers from the label at the time of use; never fill a missing identifier later. Reconcile with the operative note and the accountability record before closure; if it does not reconcile, the case is not closed as complete (F).

#	Component · role	Manufacturer · model	Catalogue no.	UDI-DI	Lot or serial	Size · configuration	Disposition	Label on sheet?
1	Baseplate · implant	GLENOS · GS-BP	GS-BP25	07612345000123	LOT 2604-118	25 mm	☒ Implanted ☐ Trial ☐ Returned ☐ Discarded ☐ Explanted	☒ Yes ☐ No
2	Central screw · implant	GLENOS · GS-CS	GS-CS30	07612345000130	LOT 2603-044	30 mm	☒ Implanted ☐ Trial ☐ Returned ☐ Discarded ☐ Explanted	☒ Yes ☐ No
3	Peripheral screws (2) · implant	GLENOS · GS-PS	GS-PS34	07612345000147	LOT 2603-090	2 × 34 mm	☒ Implanted ☐ Trial ☐ Returned ☐ Discarded ☐ Explanted	☒ Yes ☐ No
4	Glenosphere · implant	GLENOS · GS-GL	GS-GL36	07612345000154	LOT 2605-012	36 mm, neutral	☒ Implanted ☐ Trial ☐ Returned ☐ Discarded ☐ Explanted	☒ Yes ☐ No
5	Humeral stem · implant	GLENOS · GS-HS	GS-HS10	07612345000161	LOT 2604-201	Size 10, press-fit	☒ Implanted ☐ Trial ☐ Returned ☐ Discarded ☐ Explanted	☒ Yes ☐ No
6	Liner · implant	GLENOS · GS-L	GS-L36P6	07612345000178	LOT 2606-033	36, +6 mm	☒ Implanted ☐ Trial ☐ Returned ☐ Discarded ☐ Explanted	☒ Yes ☐ No
7	Trial stem · instrument	GLENOS · loaner set LS-07	GS-TS10			Size 10	☐ Implanted ☒ Trial ☐ Returned ☐ Discarded ☐ Explanted	☐ Yes ☒ No

Final implanted configuration	Baseplate 25 with 30 mm central and 2 × 34 mm screws; glenosphere 36 neutral; stem 10 press-fit, 20 degrees retroversion; liner 36 +6
Reconciled with (record and reference)	Accountability log DAL-014 p. 3; operative note ON-014-002; label sheet

ICDL - Intraoperative Checklist and Device Log

Changes, complications and device performance

SIMULATED · v0.15

ICDL ID	Participant code	Procedure date	Primary surgeon (code)
ICDL-014-002	014-002	8 Jul 2026	S-02

F Changes to the plan, substitutions and exceptions

Whenever a planned step, component, condition or sequence is changed, left out, repeated or uncertain. It does not replace the formal deviation record.

#	What happened and when	Reason	Possible effect	Immediate response · linked record
1	10:00: trial liners 36 +3, +6 and +9 not in the loaner set; no trial reduction	Set check sheet LS-07 does not list trial liners	Liner chosen on soft-tissue tension; stability less certain	Final +6 liner fitted after stability and range checked; DEV-014-2026-002; sponsor told (J-1)
2				
3				

G Complications and device performance

Describe briefly and send on at once; the safety assessment is done in the SART.

#	Event or device concern	What was seen	Related to device or procedure?	Treatment in theatre	SART · SCML
1	None		☐ Device ☐ Procedure ☐ Both ☐ Not related ☐ Unknown		
2			☐ Device ☐ Procedure ☐ Both ☐ Not related ☐ Unknown		
3			☐ Device ☐ Procedure ☐ Both ☐ Not related ☐ Unknown		

Anything that may affect participant safety, device accountability or endpoint data is sent through the local and sponsor route now; it never waits for a later review.

ICDL - Intraoperative Checklist and Device Log

Post-operative review and case closure

SIMULATED · v0.15

ICDL ID	Participant code	Procedure date	Primary surgeon (code)
ICDL-014-002	014-002	8 Jul 2026	S-02

H Review right after surgery

Before closing the case, confirm the record is usable and every route is linked.

Item	Status	Evidence or reference	Open action · owner
Final configuration and implant position documented in the operative note and the linked image	☒ Adequate ☐ Partial ☐ Not adequate ☐ N/A	ON-014-002; IQL-014-005	
Component list complete and reconciled with labels and the accountability record	☒ Adequate ☐ Partial ☐ Not adequate ☐ N/A	DAL-014 p. 3; label sheet	
Immediate post-operative condition documented in the source record	☒ Adequate ☐ Partial ☐ Not adequate ☐ N/A	Clinic note 8 Jul, 12:00	
Post-operative image taken or ordered and logged in the IQL	☒ Adequate ☐ Partial ☐ Not adequate ☐ N/A	X-ray 9 Jul; IQL-014-005	
Every safety, deviation and device-deficiency signal has a linked route	☒ Adequate ☐ Partial ☐ Not adequate ☐ N/A	DEV-014-2026-002	J-1 · coordinator

Summary of the review	Record usable. One change to the plan: no trial reduction because the loaner set had no trial liners (F-1). The deviation is recorded and the sponsor has been asked to complete the sets (J-1).

I Case closure

Complete: record usable and every route linked. Complete with open action: owner, due date and destination in J. Hold: not closed until the blocker is solved or escalated.

Closure status	Time	Responsible (name / role)	Linked open action or record
☐ Complete ☒ Complete with open action ☐ Hold	10:55	Dr L. Ortiz / Sub-investigator	J-1

ICDL - Intraoperative Checklist and Device Log

Open actions, signatures and filing
