PSEAR - Participant Screening and Eligibility Assessment Record

Participant identification, purpose and screening gates

SIMULATED · v0.94

Study / protocol GLENOS-01 / GS-2026-01	**CIP version / amendment** CIP v4.2 / none	**Site / code** Riverside Orthopedic Center / 014	**PSEAR ID / revision** PSEAR-014-019 / r0
Participant code 014-007	**Candidate code (SIFSL)** CAND-014-019	**SIFSL line** SIFSL-014, line 19	**Date first identified** 4 Aug 2026
Screening opened 11 Aug 2026	**Responsible assessor / role** Dr Lena Ortiz / Sub-investigator	**Identification key location** Locked cabinet R-214, key log v2	**Controlled location** ISF tab 5 (Screening) / PSEAR-014-019

A Purpose and use

The PSEAR records one coded participant's eligibility decision before enrollment: consent in place (B), the screening done (C), the findings that matter for eligibility (D to F), each criterion of the current CIP checked against its evidence (G), open questions and exceptions (H), and the decision (I). No participant is eligible while an item in H is open. Enrollment and handoff follow in J.

Write only what changes, explains or qualifies the decision, and cite the source for the rest. Consent forms, clinical notes, image reports and the CRF stay in their own records; the screening log (SIFSL) keeps every candidate and links to this record.

Unit of analysis	Decision supported	Inputs	Outputs
One coded participant and one eligibility decision.	Whether the candidate may be enrolled, is not eligible, or is held until an open item is resolved.	Current CIP, consent source, clinical records, image reports and Image Quality Log (IQL), laboratory results.	The decision with its evidence (I), the screening outcome for the SIFSL and the handoff to enrollment (J).

B Before screening starts

An incomplete gate blocks an eligible decision; open an item in H. Not applicable needs the CIP basis in the reference column.

Gate	Status	Evidence or reference	Limitation · H reference
Current CIP and screening pathway confirmed	☑ Confirmed ☐ Incomplete ☐ N/A	CIP v4.2 §5; screening pathway in site instruction SI-ELIG-01 v2	
Consent on the current form signed before any study-specific activity (version, date and time)	☑ Confirmed ☐ Incomplete ☐ N/A	ICF v3.0 signed 11 Aug 2026 09:10; first study activity 11 Aug 09:40 (consent folder, ISF tab 4)	
People doing the assessments delegated and trained	☑ Confirmed ☐ Incomplete ☐ N/A	Delegation log rev. 6: L. Ortiz, N. Costa, H. Meyer	
Candidate entered in the screening log (SIFSL)	☑ Confirmed ☐ Incomplete ☐ N/A	SIFSL-014 line 19 entered 4 Aug 2026	

C Screening activities

List only the activities the CIP requires for this decision. No results here: they go in D to F or stay in the source. Use a numbered continuation sheet if more rows are needed.

#	Activity or assessment	Required by the CIP?	Date	Done by (role)	Source record	Status
1	Informed consent (ICF v3.0)	☑ Yes ☐ No	11 Aug 2026	Research nurse	Consent folder, ISF tab 4	☑ Complete ☐ Incomplete ☐ Unavailable
2	Medical history, prior shoulder surgery and infection	☑ Yes ☐ No	11 Aug 2026	Sub-I	Clinic note EHR 11 Aug	☑ Complete ☐ Incomplete ☐ Unavailable
3	Physical examination: deltoid and axillary nerve	☑ Yes ☐ No	11 Aug 2026	Sub-I	Clinic note EHR 11 Aug	☑ Complete ☐ Incomplete ☐ Unavailable
4	Constant score and ASES at baseline	☑ Yes ☐ No	11 Aug 2026	Research nurse	Questionnaires Q-014-007-BL	☑ Complete ☐ Incomplete ☐ Unavailable
5	Shoulder X-ray, three views	☑ Yes ☐ No	14 Aug 2026	Radiology technologist	IQL-014-012; report RR-55120	☑ Complete ☐ Incomplete ☐ Unavailable
6	CT shoulder for glenoid assessment	☑ Yes ☐ No	14 Aug 2026	Radiology technologist	IQL-014-013; report RR-55121	☑ Complete ☐ Incomplete ☐ Unavailable
7	C-reactive protein	☑ Yes ☐ No	12 Aug 2026	Laboratory	Lab system, sample L-88310	☑ Complete ☐ Incomplete ☐ Unavailable
8	Family doctor record on prior infection	☑ Yes ☐ No	21 Aug 2026	Research nurse	Letter scanned to EHR 21 Aug	☑ Complete ☐ Incomplete ☐ Unavailable
9		☐ Yes ☐ No				☐ Complete ☐ Incomplete ☐ Unavailable
10		☐ Yes ☐ No				☐ Complete ☐ Incomplete ☐ Unavailable

PSEAR - Participant Screening and Eligibility Assessment Record

Clinical findings, imaging and objective tests

SIMULATED · v0.94

D Clinical, functional and participant-reported findings

Only components the CIP requires or that bear on a criterion. Enter the value or a short conclusion and its source.

Component	Instrument or method	Date	Finding or score	Source record	Assessor
Shoulder function	Constant score	11 Aug 2026	38 / 100	Q-014-007-BL	N. Costa
Shoulder function, self-reported	ASES	11 Aug 2026	31 / 100	Q-014-007-BL	N. Costa
Pain despite 6 months of non-operative care	Pain scale 0 to 10; history	11 Aug 2026	7 / 10; physiotherapy since Dec 2025	Clinic note 11 Aug	L. Ortiz
Active forward elevation	Goniometer	11 Aug 2026	70 degrees	Clinic note 11 Aug	L. Ortiz
Deltoid and axillary nerve	Muscle grading; sensation	11 Aug 2026	Deltoid M5; sensation intact	Clinic note 11 Aug	L. Ortiz

E1 Imaging and objective tests

One short finding only when it explains eligibility. Image-set quality is in the IQL; the full report stays in its source.

#	Modality or test	Date	Region or target	Report or source (IQL ID)	Adequate for the decision?	Finding relevant to eligibility
1	X-ray, three views	14 Aug 2026	Right shoulder	IQL-014-012; RR-55120	☑ Yes ☐ No	Hamada grade 4a; superior migration of the head
2	CT	14 Aug 2026	Right glenoid and scapula	IQL-014-013; RR-55121	☑ Yes ☐ No	Walch B2, retroversion 12 degrees; see E2
3	C-reactive protein	12 Aug 2026	Blood	Sample L-88310	☑ Yes ☐ No	3 mg/L (normal)
4					☐ Yes ☐ No	

E2 What the images mean for eligibility

Only for image findings that decide a criterion. The criterion outcome itself goes in G.

Imaging question	Interpretation for eligibility	Source · reviewer
Cuff tear arthropathy present (inclusion 2)?	Yes: Hamada 4a meets the CIP definition.	RR-55120 · Dr H. Meyer, 15 Aug
Glenoid bone loss needing a graft (exclusion 4)?	No: B2 with 12 degrees retroversion, correctable by reaming. First read by the Sub-I as possible B3; settled by the PI (H-1).	RR-55121 · Dr H. Meyer, 15 Aug; PI 21 Aug

F Indication and planned procedure

Complete only when the CIP makes compatibility part of eligibility. Do not repeat D or E.

Element	Compatibility statement	Source · reviewer	Status
Indication for the planned procedure	Cuff tear arthropathy with loss of active elevation	Clinic note 11 Aug · L. Ortiz	☑ Confirmed ☐ Not confirmed ☐ N/A
Procedure or treatment pathway in the CIP	Primary reverse arthroplasty, deltopectoral approach	CIP §6.1 · L. Ortiz	☑ Confirmed ☐ Not confirmed ☐ N/A
Planned device, size or configuration	GLENOS baseplate 25 mm, glenosphere 36 from CT plan PLAN-014-007	Planning software report · L. Ortiz	☑ Confirmed ☐ Not confirmed ☐ N/A
Other study-specific requirement			☐ Confirmed ☐ Not confirmed ☑ N/A

G Each criterion against its evidence

One row per inclusion or exclusion criterion of the current CIP. For an exclusion, Met means the exclusion is absent. Cite where the evidence is and the date it became available. Missing or conflicting evidence is Incomplete: open an item in H. A second reviewer only where the CIP or site pathway requires it; the PI settles a disagreement in H.

#	Type	CIP criterion (number and short text)	Evidence location · date available	Outcome	Primary reviewer · date	Second reviewer · date	H reference
1	☑ Inclusion ☐ Exclusion	Inclusion 1 · Age 60 years or older	ID card copy, 11 Aug · 11 Aug	☑ Met ☐ Not met ☐ Incomplete	L. Ortiz 21 Aug		
2	☑ Inclusion ☐ Exclusion	Inclusion 2 · Cuff tear arthropathy, Hamada 2 or higher	E1-1, E2-1 · 15 Aug	☑ Met ☐ Not met ☐ Incomplete	L. Ortiz 21 Aug	H. Meyer 15 Aug	
3	☑ Inclusion ☐ Exclusion	Inclusion 3 · Pain 5 or more after 6 months of non-operative care	D-3 · 11 Aug	☑ Met ☐ Not met ☐ Incomplete	L. Ortiz 21 Aug		
4	☑ Inclusion ☐ Exclusion	Inclusion 4 · Planned primary reverse arthroplasty with GLENOS	F-1 to F-3 · 15 Aug	☑ Met ☐ Not met ☐ Incomplete	L. Ortiz 21 Aug		
5	☑ Inclusion ☐ Exclusion	Inclusion 5 · Able to attend visits to 24 months	Clinic note 11 Aug · 11 Aug	☑ Met ☐ Not met ☐ Incomplete	L. Ortiz 21 Aug		
6	☐ Inclusion ☑ Exclusion	Exclusion 1 · Previous arthroplasty of the same shoulder	C-2, clinic note · 11 Aug	☑ Met ☐ Not met ☐ Incomplete	L. Ortiz 21 Aug		
7	☐ Inclusion ☑ Exclusion	Exclusion 2 · Shoulder infection in the past 12 months	C-7, C-8, E1-3 · 21 Aug	☑ Met ☐ Not met ☐ Incomplete	L. Ortiz 21 Aug		H-2
8	☐ Inclusion ☑ Exclusion	Exclusion 3 · Deltoid deficiency or axillary nerve palsy	D-5 · 11 Aug	☑ Met ☐ Not met ☐ Incomplete	L. Ortiz 21 Aug		
9	☐ Inclusion ☑ Exclusion	Exclusion 4 · Glenoid bone loss needing a graft	E1-2, E2-2 · 15 Aug; PI 21 Aug	☑ Met ☐ Not met ☐ Incomplete	L. Ortiz 21 Aug	H. Meyer 15 Aug	H-1
10	☐ Inclusion ☑ Exclusion	Exclusion 5 · Neuromuscular disease of the upper limb	Clinic note 11 Aug · 11 Aug	☑ Met ☐ Not met ☐ Incomplete	L. Ortiz 21 Aug		
11	☐ Inclusion ☑ Exclusion	Exclusion 6 · In another interventional study	Participant statement, SIFSL · 11 Aug	☑ Met ☐ Not met ☐ Incomplete	L. Ortiz 21 Aug		
12	☐ Inclusion ☐ Exclusion			☐ Met ☐ Not met ☐ Incomplete			

PSEAR - Participant Screening and Eligibility Assessment Record

Open items and decision

SIMULATED · v0.94

H Open items and exceptions

Only for missing, conflicting or unavailable eligibility information. No eligible decision while an item is open. Routine care and CAPA stay in their own records.

#	Missing item · criterion affected	Effect and immediate action	Owner (role)	Due date	Status · resolution
1	Exclusion 4: Sub-I read the CT as possible B3; radiologist read B2	No decision until settled; PI to review CT with both readers	PI	22 Aug 2026	☐ Open ☑ Resolved Resolved: PI agrees B2, no graft (note 21 Aug)
2	Exclusion 2: infection history before 2024 not in the hospital record	No decision until known; letter requested from the family doctor	Research nurse	22 Aug 2026	☐ Open ☑ Resolved Resolved: letter 21 Aug, no infection
3					☐ Open ☐ Resolved
4					☐ Open ☐ Resolved

I Eligibility decision

Eligible needs every gate Yes. Write what confirms each gate (counts, times, item numbers); cite sections and records in the rationale; do not repeat findings.

Gate	Result	Confirmed in (section and what was checked)
Required screening activities complete	☑ Yes ☐ No	C: 8 of 8 activities complete
Every criterion met, including absence of each exclusion	☑ Yes ☐ No	G: 5 of 5 inclusions met; 6 of 6 exclusions absent
Consent confirmed before study-specific activity	☑ Yes ☐ No	B: consent 09:10, first activity 09:40 on 11 Aug
No open item or exception	☑ Yes ☐ No	H: 2 of 2 items resolved by 21 Aug

Decision	☑ Eligible ☐ Not eligible ☐ Held: item open in H
Rationale (sections and records)	C complete (8 of 8). G: all 5 inclusions met and all 6 exclusions absent; exclusion 4 settled by the PI on 21 Aug (H-1), exclusion 2 by the family doctor letter (H-2). Consent before the first study activity (B-2).

J Enrollment and handoff

Enrollment only after an eligible decision. These entries show the sequence; the decision stays in I.

Decision date and time	21 Aug 2026, 16:40
Enrollment date and time · enrollment record	21 Aug 2026, 17:05 · EDC subject 014-007
Screening log (SIFSL) entry updated	SIFSL-014 line 19: enrolled, 21 Aug 2026
Next record opened (for example the ICDL)	Surgery booked 2 Oct 2026; ICDL-014-007 opened 1 Oct
If not enrolled: reason entered in the SIFSL	Not applicable

K Signatures and filing

The signatures confirm the current CIP, dated evidence, any required second review and the decision.

Primary screening assessor

Name / role: Dr L. Ortiz / Sub-I

Signature / date and time:

L. Ortiz 21 Aug 2026, 16:40

Investigator

Name / role: Dr A. Morgan / PI

Signature / date and time:

A. Morgan 21 Aug 2026, 16:55

Second reviewer (if required)

Name / role: Dr H. Meyer / MSK radiologist

Signature / date and time:

H. Meyer 15 Aug 2026, 11:20
