SIFSL - Subject Identification and Failure Screening Log

Log identification, purpose and rules

Study / protocol	CIP version	Site / code	SIFSL ID / revision
Period covered / data cut-off	**Log owner / role**	**Identity key location (kept separately)**	**Controlled location**

A Purpose and use

The SIFSL lists every person considered for the investigation under a code, whatever happened next, and keeps their current status and final outcome. It links each eligibility decision to its Participant Screening and Eligibility Assessment Record (PSEAR) and each enrollment to its record, so that at every cut-off the site can account for every candidate (E). It does not decide eligibility, which belongs to the PSEAR, and it does not calculate rates, which belong to the Performance Indicator Review (PIR).

Unit of analysis	Decision supported	Inputs	Outputs
One coded person on one line, updated as the person moves through screening.	Whether every candidate is accounted for, and whether any link between log, PSEAR and enrollment is missing or wrong.	Candidate referrals, current CIP, PSEAR records, enrollment records.	Counts by status and category (F) for the PIR; reconciliation issues (E) and their route.

B Rules for the log

Codes only	No names, initials, birth dates, contact details or clinical details. The key linking codes to identity is kept separately under controlled access.
One line per person	Update the same line when the status changes; never open a second line for the same person.
Cite, do not copy	Write the PSEAR ID and the enrollment record; the reasons and evidence stay in those records.
No PSEAR before screening	A person only considered does not need a PSEAR until formal screening starts.
Continuation sheets	Reprint the register page with the next sheet number; lines are numbered across sheets.

C Status and non-inclusion categories

Write the status in words in the register. A non-inclusion category applies only to Not eligible, Withdrawn before enrollment and Closed: other outcome; it is administrative and never replaces the PSEAR.

Status	Use when	Required on the line
Considered	The coded person was considered; no formal screening yet.	Date first considered
Screening active	Screening has started and is in progress.	Date screening opened
Awaiting eligibility decision	Evidence or review pending. Never treated as eligible.	PSEAR ID
Eligible, awaiting enrollment	Eligible decision made; enrollment not yet done.	PSEAR ID and decision date
Enrolled	Enrollment done.	PSEAR ID and enrollment record
Not eligible	The PSEAR decision does not allow inclusion.	PSEAR ID and category
Withdrawn before enrollment	The person or the process left screening before inclusion.	Category
Closed: other outcome	An outcome not covered above.	Category and controlled reference

Non-inclusion categories

Category	Use when
1 · Criterion not met	One or more criteria not met; details stay in the PSEAR.
2 · Assessment incomplete or unavailable	A required assessment was not done or not available in time.
3 · Consent or participant decision	Declined, withdrew consent or could not follow the consent route. No personal detail.
4 · Screening stopped before a decision	Screening ended for a controlled reason before any decision.
5 · Study or site constraint	Recruitment closed, quota, or a sponsor or site decision.
6 · Other	Any other reason; cite the controlled record.

SIFSL - Subject Identification and Failure Screening Log

Candidate register

D Candidate register

One line per coded person, in the order first considered. Update the line when the status changes. Leave the category blank while the person is still in screening or enrolled.

Sheet no. _____

Line	Candidate code	First considered	Screening opened	Status (C)	Status date	PSEAR ID	Non-inclusion category (1–6)	Enrollment date · record	Issue ID (E)

SIFSL - Subject Identification and Failure Screening Log

Candidate register

D Candidate register (continued)

Sheet no. _____

Line	Candidate code	First considered	Screening opened	Status (C)	Status date	PSEAR ID	Non-inclusion category (1–6)	Enrollment date · record	Issue ID (E)

E Reconciliation at the cut-off

Check all sheets against the PSEAR and enrollment records. Correct a single issue in the record that owns it and note the correction here.

Check	Result	Evidence or issue ID
Every line has a code and a current status; every closed line has a final outcome.	☐ Yes ☐ No	
Every eligibility decision (eligible or not) has a PSEAR ID.	☐ Yes ☐ No	
Every enrolled person has both a PSEAR ID and an enrollment record, with matching dates.	☐ Yes ☐ No	
Every person still in screening has someone following up; every closed non-inclusion has a category.	☐ Yes ☐ No	
No duplicate code, and no PSEAR or enrollment record missing from the log.	☐ Yes ☐ No	

Issues found

Counts, review and filing

F Counts at the cut-off

Count each person once by status and each closed non-inclusion once by category. These counts reconcile the population; the PIR judges enrollment quality.

Status	Count	Non-inclusion category	Count
Considered		**1 · Criterion not met**	
Screening active		**2 · Assessment incomplete or unavailable**	
Awaiting eligibility decision		**3 · Consent or participant decision**	
Eligible, awaiting enrollment		**4 · Screening stopped before a decision**	
Enrolled		**5 · Study or site constraint**	
Not eligible		**6 · Other**	
Withdrawn before enrollment		**Total closed non-inclusions**	
Closed: other outcome			
Total coded candidates			

Sent to (record · owner · date), or none needed	

G Review and filing
