PIR - Performance Indicator Record

Review identification, purpose and boundary

SIMULATED · v1.0

Study / protocol GLENOS-01 / GS-2026-01	**CIP version** CIP v4.2	**Site / code** Riverside Orthopedic Center / 014	**PIR ID** PIR-014-2026-10
Period reviewed / data cut-off 1 to 31 Oct 2026 / 31 Oct 2026	**Previous PIR** PIR-014-2026-09	**Rule set (version, effective date)** PIR-RS-014 v1, 12 Aug 2026	**Review date** 5 Nov 2026
Review type ☒ Routine ☐ Early cases ☐ Triggered ☐ Action check	**Prepared by / role** Maria Silva / Study Coordinator	**Accountable reviewer / role** Dr Alex Morgan / PI	**Controlled location** ISF tab 3 (Quality) / PIR-014-2026-10

A Purpose and use

The PIR reviews the site's performance over one period through six indicators fixed before the first participant, plus any the site adds. It takes the results already reported by the source records (FUCR, SLCT, CSST, IMC, SART and others) and does not recount them. What it adds is the reading across time and across indicators: how each result moves over the last periods (D), and whether problems in different indicators share the same participants, surgeon, staff, time or process step (E). From that it decides what to correct (F), checks whether earlier actions worked (G) and concludes on the period (H).

Every result keeps its count and denominator; a percentage alone hides small numbers. A rule is never changed to fit a result; a new rule applies from its effective date.

Unit of analysis	Decision supported	Inputs	Outputs
One site, one review period, each indicator with its own denominator.	Whether each indicator is within its rule, needs closer review or action, and what the site must improve.	Results of the source records; the previous PIR; the rule set.	Trend and links (D, E); improvement actions with a check (F, G); routes to CAPA, SRR, POT, SLCT or the sponsor.

B Review boundary

Fix the boundary before reading any result.

Records included (IDs or ranges, cut-off)	SIFSL-014 rev. 23; PSEAR-014-019 to -022; ICDL-014-007, -008; FUCR-014-2026-10; SLCT S-01 to S-03; CSST-014-02; IMC-014-02; SART-014-004, -005; query report 31 Oct
Records missing, late or excluded, and the effect on denominators	FUCR for October closed 3 Nov (late); its counts are final. No record excluded.
Rule or source changes in the period	None. Rule set v1 in force for July to October.
Periods compared and whether they are comparable	July to October, same rules and units; July and August have few cases

PIR - Performance Indicator Record

Indicator rules

SIMULATED · v1.0

PIR ID	Site / code	Period / data cut-off	Rule set (version)
PIR-014-2026-10	Riverside / 014	Oct 2026 / 31 Oct	PIR-RS-014 v1

C Indicator rules

Set before the first participant and approved by the PI. Write each condition so that two reviewers reach the same decision. Rows 7 and 8 are for indicators the site adds.

Indicator	Source records	Unit (denominator)	Within rule when	Closer review when	Action required when	Rule ID · version
1 · Enrollment quality	PSEAR, SIFSL, deviation record	Inclusion decisions	Every criterion evidenced before the decision; no important eligibility deviation	A clarification after enrollment	Any important eligibility deviation	PIR-01 v1
2 · Protocol deviations	Deviation record, ICDL, IMC	Procedures	No important deviation of the same type in two periods	One important deviation in the period	Same type again after a correction	PIR-02 v1
3 · Follow-up compliance	FUCR, PFVR	Expected visits	In window with all components: 90% or more	80 to 89%, or worse two periods in a row	Below 80%	PIR-03 v1
4 · Safety reporting timeliness	SART	Reportable cases	All sent within the CIP interval	One complete first report missing	Any late report	PIR-04 v1
5 · Surgeon procedural consistency	SLCT, ICDL, CSST	Procedures per surgeon	No unplanned event in the surgeon's last 5 cases	One unplanned event (substitution, deviation, support, grade IIIa or higher)	Two or more in the last 5 cases	PIR-05 v1
6 · Critical data completeness	IMC, query log, operative notes	Endpoint fields sampled	Agreement 99% or more; no query open over 10 days	Agreement 97 to 98.9%, or queries over 10 days	Agreement below 97%, or the same error twice	PIR-06 v1

PIR - Performance Indicator Record

Results across periods

SIMULATED · v1.0

PIR ID	Site / code	Period / data cut-off	Rule set (version)
PIR-014-2026-10	Riverside / 014	Oct 2026 / 31 Oct	PIR-RS-014 v1

D Results across periods

Copy each result from its source record as count / denominator (%). Direction compares the last four periods: a change counts when it passes the closer-review margin or lasts two periods in a row; with fewer than three periods write Too few periods.

Indicator	Three periods back	Two periods back	Last period	This period	Cumulative	Direction	Decision (C)
1 · Enrollment quality	3 / 3 (100%)	2 / 2 (100%)	1 / 1 (100%)	0 / 0	8 / 8 (100%)	☐ Better ☒ Stable ☐ Worse ☐ Too few periods	☒ Within rule ☐ Closer review ☐ Action required ☐ Not assessable
2 · Protocol deviations	1 / 3	0 / 1	0 / 2	2 / 2	3 / 8	☐ Better ☐ Stable ☒ Worse ☐ Too few periods	☐ Within rule ☐ Closer review ☒ Action required ☐ Not assessable
3 · Follow-up compliance	3 / 3 (100%)	5 / 6 (83%)	6 / 7 (86%)	5 / 7 (71%)	19 / 23 (83%)	☐ Better ☐ Stable ☒ Worse ☐ Too few periods	☐ Within rule ☐ Closer review ☒ Action required ☐ Not assessable
4 · Safety reporting timeliness	0 / 0	0 / 0	1 / 1	1 / 1	2 / 2	☐ Better ☐ Stable ☐ Worse ☒ Too few periods	☒ Within rule ☐ Closer review ☐ Action required ☐ Not assessable
5 · Surgeon procedural consistency	1 / 3	0 / 1	1 / 2	1 / 2	S-01 0 / 3; S-02 1 / 3; S-03 2 / 2	☐ Better ☐ Stable ☒ Worse ☐ Too few periods	☐ Within rule ☐ Closer review ☒ Action required ☐ Not assessable
6 · Critical data completeness	60 / 60	118 / 118	120 / 120	116 / 118 (98.3%)	414 / 416 (99.5%)	☐ Better ☐ Stable ☒ Worse ☐ Too few periods	☐ Within rule ☐ Closer review ☒ Action required ☐ Not assessable
						☐ Better ☐ Stable ☐ Worse ☐ Too few periods	☐ Within rule ☐ Closer review ☐ Action required ☐ Not assessable
						☐ Better ☐ Stable ☐ Worse ☐ Too few periods	☐ Within rule ☐ Closer review ☐ Action required ☐ Not assessable

PIR ID	Site / code	Period / data cut-off	Rule set (version)
PIR-014-2026-10	Riverside / 014	Oct 2026 / 31 Oct	PIR-RS-014 v1

E Links between indicators

For every indicator not within its rule, look for the same participants, surgeon, staff member, time point, component or process step in the other indicators and in the source records. Write what was compared and the counts. A shared pattern is a lead to test, not a proof of cause.

#	Pattern seen	Indicators involved	What was compared (records and counts)	Likely shared cause	Conclusion
1	Both instability events came after a missing trial liner or an unplanned liner change	2, 5 and CSST	ICDL F sections of 002, 005 and 007; CSST-014-02 instability rows; SLCT S-02, S-03: 2 of 2 events in such cases, 0 of 5 in the others	Loaner-set check sheet does not list trial liners; not the surgeon alone	☒ Supported ☐ Not supported ☐ Open: needs more data
2	Follow-up gaps and transcription errors in the same weeks	3 and 6	PFVR and IMC-014-02: 3 of 4 issues on visits 1 to 14 Oct, while the research nurse was on leave	No cover plan for questionnaires and data entry during absence	☒ Supported ☐ Not supported ☐ Open: needs more data
3	Both instability events in fracture-sequelae cases	1, 5 and CSST	CSST E3: 2 of 2 fracture sequelae vs 0 of 6 others; PSEAR indication correct in both	Case type; numbers too small	☐ Supported ☐ Not supported ☒ Open: needs more data
4					☐ Supported ☐ Not supported ☐ Open: needs more data

PIR - Performance Indicator Record

Improvement actions and their effect

SIMULATED · v1.0

PIR ID	Site / code	Period / data cut-off	Rule set (version)
PIR-014-2026-10	Riverside / 014	Oct 2026 / 31 Oct	PIR-RS-014 v1

F Improvement actions

One action per cause found in D or E. Set the check that will show it worked before starting it. The receiving record owns the action.

Action	What will change (from D or E)	Receiving record	Owner	Due	How we will know it worked (indicator, value, period)
PIR-A1	Trial liners on the loaner-set check sheet; no case starts without them (E-1)	CAPA-014-04; SRR R-09	OR nurse lead	15 Nov	Indicator 2: no trial-less case in the next 5 procedures
PIR-A2	Cover plan for questionnaires and data entry when the research nurse is away (E-2)	SRR R-13; delegation log	Coordinator	30 Nov	Indicator 3 at 90% or more and indicator 6 at 99% or more in Nov and Dec
PIR-A3	Report instability by case type to the sponsor at the next safety call (E-3)	Sponsor call minutes	PI	20 Nov	Sponsor answer recorded; case type added to the next CSST

G Did earlier actions work?

Compare the indicator before and after with the check set in F. Done is not the same as effective.

Action	Check set when assigned	Value before	Value now	Result	Next step
ICDL J-1	Sponsor completes the loaner sets (July)	Jul: 1 trial-less case	Oct: 1 trial-less case	☐ Worked ☒ Did not work ☐ Too early	Replaced by PIR-A1 (site check, not sponsor request)
IMC A-01-03	No late image set in two months	Jul: 2 late	Sep, Oct: 0 late	☒ Worked ☐ Did not work ☐ Too early	Close
				☐ Worked ☐ Did not work ☐ Too early	
				☐ Worked ☐ Did not work ☐ Too early	

PIR - Performance Indicator Record

Period conclusion

SIMULATED · v1.0

PIR ID	Site / code	Period / data cut-off	Rule set (version)
PIR-014-2026-10	Riverside / 014	Oct 2026 / 31 Oct	PIR-RS-014 v1

H Period conclusion

The conclusion covers only the stated period, records and indicators; it does not certify the site.

Decision	Count	Indicators
Within rule	2	1, 4
Closer review	0	
Action required	4	2, 3, 5, 6
Not assessable	0	

Site performance over the periods	☐ Improving ☐ Stable ☒ Declining ☐ Mixed
What the site learned this period	Four indicators need action in October, but they trace back to two process causes, not to many separate problems: loaner sets without trial liners (indicators 2 and 5, and the instability in the CSST) and no cover when the research nurse is away (indicators 3 and 6). The July request to the sponsor did not fix the sets; the fix has to be the site's own check before each case.
Routes opened (CAPA, SRR, POT, SLCT, sponsor) or none	CAPA-014-04; SRR R-09 and R-13 updated; POT-014-08 (S-03 proctoring continues); sponsor call 20 Nov
Next review (date or trigger)	PIR-014-2026-11, 5 Dec 2026; earlier if a trial-less case occurs
