PSEAR - Participant Screening and Eligibility Assessment Record

Participant identification, purpose and screening gates

A Purpose and use

The PSEAR records one coded participant's eligibility decision before enrollment: consent in place (B), the screening done (C), the findings that matter for eligibility (D to F), each criterion of the current CIP checked against its evidence (G), and the decision (H). Open questions go to I, and no participant is eligible while one is open. Enrollment and handoff follow in J.

Write only what changes, explains or qualifies the decision, and cite the source for the rest. Consent forms, clinical notes, image reports and the CRF stay in their own records; the screening log (SIFSL) keeps every candidate and links to this record.

Unit of analysis	Decision supported	Inputs	Outputs
One coded participant and one eligibility decision.	Whether the candidate may be enrolled, is not eligible, or is held until an open item is resolved.	Current CIP, consent source, clinical records, image reports and Image Quality Log (IQL), laboratory results.	The decision with its evidence (H), the screening outcome for the SIFSL and the handoff to enrollment (J).

B Before screening starts

An incomplete gate blocks an eligible decision; open an item in I. Not applicable needs the CIP basis in the reference column.

Gate	Status	Evidence or reference	Limitation · I reference
Current CIP and screening pathway confirmed	☐ Confirmed ☐ Incomplete ☐ N/A		
Consent on the current form signed before any study-specific activity (version, date and time)	☐ Confirmed ☐ Incomplete ☐ N/A		
People doing the assessments delegated and trained	☐ Confirmed ☐ Incomplete ☐ N/A		
Candidate entered in the screening log (SIFSL)	☐ Confirmed ☐ Incomplete ☐ N/A		

C Screening activities

List only the activities the CIP requires for this decision. No results here: they go in D to F or stay in the source. Use a numbered continuation sheet if more rows are needed.

#	Activity or assessment	Required by the CIP?	Date	Done by (role)	Source record	Status
1		☐ Yes ☐ No				☐ Complete ☐ Incomplete ☐ Unavailable
2		☐ Yes ☐ No				☐ Complete ☐ Incomplete ☐ Unavailable
3		☐ Yes ☐ No				☐ Complete ☐ Incomplete ☐ Unavailable

D Clinical, functional and participant-reported findings

Only components the CIP requires or that bear on a criterion. Enter the value or a short conclusion and its source.

Component	Instrument or method	Date	Finding or score	Source record	Assessor

E1 Imaging and objective tests

One short finding only when it explains eligibility. Image-set quality is in the IQL; the full report stays in its source.

#	Modality or test	Date	Region or target	Report or source (IQL ID)	Adequate for the decision?	Finding relevant to eligibility
1					☐ Yes ☐ No	
2					☐ Yes ☐ No	
3					☐ Yes ☐ No	
4					☐ Yes ☐ No	

E2 What the images mean for eligibility

Only for image findings that decide a criterion. The criterion outcome itself goes in G.

Imaging question	Interpretation for eligibility	Source · reviewer

F Indication and planned procedure

Complete only when the CIP makes compatibility part of eligibility. Do not repeat D or E.

Element	Compatibility statement	Source · reviewer	Status
Indication for the planned procedure			☐ Confirmed ☐ Not confirmed ☐ N/A
Procedure or treatment pathway in the CIP			☐ Confirmed ☐ Not confirmed ☐ N/A
Planned device, size or configuration			☐ Confirmed ☐ Not confirmed ☐ N/A
Other study-specific requirement			☐ Confirmed ☐ Not confirmed ☐ N/A

G Each criterion against its evidence

One row per inclusion or exclusion criterion of the current CIP. For an exclusion, Met means the exclusion is absent. Cite where the evidence is and the date it became available. Missing or conflicting evidence is Incomplete: open I. A second reviewer only where the CIP or site pathway requires it; the PI settles a disagreement in I.

#	Type	CIP criterion (number and short text)	Evidence location · date available	Outcome	Primary reviewer · date	Second reviewer · date	I reference
1	☐ Inclusion ☐ Exclusion			☐ Met ☐ Not met ☐ Incomplete			
2	☐ Inclusion ☐ Exclusion			☐ Met ☐ Not met ☐ Incomplete			
3	☐ Inclusion ☐ Exclusion			☐ Met ☐ Not met ☐ Incomplete			
4	☐ Inclusion ☐ Exclusion			☐ Met ☐ Not met ☐ Incomplete			
5	☐ Inclusion ☐ Exclusion			☐ Met ☐ Not met ☐ Incomplete			
6	☐ Inclusion ☐ Exclusion			☐ Met ☐ Not met ☐ Incomplete			
7	☐ Inclusion ☐ Exclusion			☐ Met ☐ Not met ☐ Incomplete			
8	☐ Inclusion ☐ Exclusion			☐ Met ☐ Not met ☐ Incomplete			
9	☐ Inclusion ☐ Exclusion			☐ Met ☐ Not met ☐ Incomplete			
10	☐ Inclusion ☐ Exclusion			☐ Met ☐ Not met ☐ Incomplete			
11	☐ Inclusion ☐ Exclusion			☐ Met ☐ Not met ☐ Incomplete			
12	☐ Inclusion ☐ Exclusion			☐ Met ☐ Not met ☐ Incomplete			

H Eligibility decision

Eligible needs every gate Yes. Cite sections and records in the rationale; do not repeat findings.

Gate	Result	Where it is shown
Required screening activities complete	☐ Yes ☐ No	C
Every criterion met, including absence of each exclusion	☐ Yes ☐ No	G
Consent confirmed before study-specific activity	☐ Yes ☐ No	B
No open item in I	☐ Yes ☐ No	I

Decision	☐ Eligible ☐ Not eligible ☐ Held until I is resolved
Rationale (sections and records)	

I Open items and exceptions

Only for missing, conflicting or unavailable eligibility information. No eligible decision while an item is open. Routine care and CAPA stay in their own records.

#	Missing item · criterion affected	Effect and immediate action	Owner (role)	Due date	Status · resolution
1					☐ Open ☐ Resolved
2					☐ Open ☐ Resolved
3					☐ Open ☐ Resolved
4					☐ Open ☐ Resolved

J Enrollment and handoff

Enrollment only after an eligible decision. These entries show the sequence; the decision stays in H.
