DTRM - Device and Study Training Requirements Matrix

DTRM · v0.2

Study / Protocol	Site / Code	Matrix / Record ID	Effective Date
CIP / Procedure Version	**Device / IFU Version**	**Training Package Reference**	**Approval Status**
Change Trigger / Reason		**Linked Controlled Records**	

A Purpose, Use and decision boundary

Purpose and use: Map current sponsor and study training requirements to site functions. Use this matrix to define what each profile needs, not to create technical training content or authorize staff. Individual completion, competence and release remain in the TRE; task boundaries and supervision remain in the CCDM; the assignment of released people to tasks is recorded in the RACI.

Element	Scope / decision	Record / link
Unit of analysis	One site matrix for defined role profiles and the current training package.	Profile IDs in C; module IDs and the CCDM task IDs they support in D.
Decision supported	Identify applicable requirements before an individual is considered for a delegated function.	TR / AS / CD / AW / NA in E and F; conditions stated in the last column.
Inputs	Current sponsor materials, protocol, IFU and site delegation / supervision boundaries.	CIP, training package and CCDM versions; controlled source locations.
Outputs / boundary	Role-specific requirements and targeted change-impact decisions. Not attendance, competence or individual authorization.	Feeds the TRE (the requirement each individual release is checked against) and the RACI (the profiles a released person may be assigned to). SCR where applicable; CCDM for task limits.

B Requirement code and consequence

TR - Trained
Complete the module before performing the relevant activity. Evidence of completion is enough.

AS - Assessed
Complete the module and demonstrate competence by the method in D before performing the activity independently.

CD - Conditional
Applies only to the stated activity or trigger. The condition column gives the level that then applies (TR or AS).

AW - Awareness
Know the topic and the escalation route; no technical activity is assigned.

NA - Not applicable
Outside this profile's function; the module does not apply.

Approval of this matrix sets the training standard only. It does not release any person and does not change CCDM task boundaries or supervision.

C Role profile register

Profile ID	Role / function group	Activity boundary / CCDM	Profile owner (role)	Prerequisite

D Training module inventory

Current sponsor-provided or study-required activities only. The matrix maps applicability; the linked package remains the source of technical content.

Module ID	Training activity / subject	CCDM tasks	Controlled source / version	Assessment method (AS)	Renewal / retraining trigger

DTRM - Device and Study Training Requirements Matrix

Study / site	DTRM record ID / revision	Effective date	Mapping sheet number / total sheets

E Role-to-requirement matrix - profiles 1 to 4

Module ID	Training activity / subject	Profile ID / role	Profile ID / role	Profile ID / role	Profile ID / role	Condition, limitation or release boundary

If more modules are needed, reprint this page, number each mapping sheet and include all sheets in the final approved DTRM.

DTRM - Device and Study Training Requirements Matrix

Role mapping II

Study / site	DTRM record ID / revision	Effective date	Mapping sheet number / total sheets

F Role-to-requirement matrix - profiles 5 to 7

Module ID	Training activity / subject	Profile ID / role	Profile ID / role	Profile ID / role	Condition, limitation or release boundary

If more profiles are needed, reprint this page with the next profile numbers, number each mapping sheet and include all sheets in the final approved DTRM.

G Matrix completion and individual-record gate

Before issue, confirm that...	Yes	No	Evidence / action
Profiles match current CCDM task boundaries and supervision.	☐	☐	
Every module has a current controlled source / version.	☐	☐	
Codes reflect each profile's actual activities.	☐	☐	
Every AS code has an assessment method in Section D.	☐	☐	
Every CD code states its condition and the level that applies.	☐	☐	

H Change, retraining and matrix-impact log

Date / trigger	Affected modules / profiles	Requirement change / individual impact	Owner / due boundary	Status / linked record

I Approval and controlled use

Approval controls the requirements reference only. It does not release any person and does not change CCDM task boundaries or supervision.

Matrix owner
