PFVR - PARTICIPANT FOLLOW-UP VISIT RECORD

PFVR - v0.3

Site Name / Code	Protocol Number	Participant ID	Device / Study Arm
Visit Number / Name	Planned Visit Date	Actual Visit Date	Reviewer / Date
Nominal Visit Window / Days from Target Date		Visit Status ☐ Planned ☐ Completed ☐ Late ☐ Missed ☐ Partial	

A Purpose and Use

The Participant Follow-up Visit Record documents one participant at one follow-up visit. It records whether the planned visit occurred, which visit components were completed, whether timing and methods were appropriate, what the participant reported, what objective assessments showed, and whether any exception requires action or escalation.

This is an individual source record. It is not the macro-level **Follow-up Compliance Review**, which will aggregate records across participants and visits to calculate compliance indicators and trends.

Use one PFVR for each participant and each visit. Complete only the components applicable to that participant, protocol, device and visit. Do not use “Not applicable” simply because a component was omitted without a documented reason.

B Applicable Visit Component Guide

How to use this page: The examples below are a guide, not a pre-populated checklist. In the visit record, enter only the components required for this participant and visit. Record what was planned, what occurred, whether it was within the window, what the result showed and what action was taken when something was incomplete or abnormal.

Component family	Examples that may be applicable	Record in the visit component table
Imaging and objective tests	• CT • Radiographic examination • MRI • Ultrasound • Laboratory tests • Other protocol-defined tests	• Test performed • Date and window • Result available • Reviewer • Finding • Linked record
Patient-reported outcomes	• Pain • Discomfort • Functional limitation • Instability • Swelling • New symptom • Persistent symptom • Improvement / satisfaction	• Participant’s words • Onset / duration • Severity / relevance • Change since prior visit • Action or referral • Linked record
Clinical and functional assessment	• Physical examination • Range of motion • Strength • Stability • Gait • Wound status • Functional score • Questionnaire / device exam	• Method / instrument • Assessor • Result • Comparison with prior visit • Relevant change • Action
Care and safety review	• Physiotherapy evaluation • Medication review • Safety review • Referral / complication follow-up	• Responsible person • Completion status • Linked record • Escalation • Follow-up action

When something is outside the expected pathway	What to clarify	Where to record the response	Typical final status
Late, missed or partial visit	Reason, days outside window, participant impact and data impact	Timing section, component table and exception response	Compliant with observation or non-compliant / action required
Unexpected finding or participant concern	Clinical relevance, review required, referral and linked safety record	Patient report, clinical assessment and exception response	Observation, action or escalation

C Visit Timing and Completion

Timing question	Yes	No	Explanation / record / action
Did the visit occur within the nominal visit window?	☐	☐	
Were all planned visit components completed or appropriately rescheduled?	☐	☐	
Was any delay, missed visit or partial visit documented with a reason?	☐	☐	

D Required Visit Components

No.	Visit component / assessment	Planned date / window	Actual date	Completion status	Within window?	Evidence / observation / linked record
1				☐ Complete ☐ Late ☐ Partial ☐ Missed	☐ Yes ☐ No ☐ N/A	
2				☐ Complete ☐ Late ☐ Partial ☐ Missed	☐ Yes ☐ No ☐ N/A	
3				☐ Complete ☐ Late ☐ Partial ☐ Missed	☐ Yes ☐ No ☐ N/A	
4				☐ Complete ☐ Late ☐ Partial ☐ Missed	☐ Yes ☐ No ☐ N/A	
5				☐ Complete ☐ Late ☐ Partial ☐ Missed	☐ Yes ☐ No ☐ N/A	
6				☐ Complete ☐ Late ☐ Partial ☐ Missed	☐ Yes ☐ No ☐ N/A	
7				☐ Complete ☐ Late ☐ Partial ☐ Missed	☐ Yes ☐ No ☐ N/A	
8				☐ Complete ☐ Late ☐ Partial ☐ Missed	☐ Yes ☐ No ☐ N/A	

Leave the component name open and enter only what is required for this participant and visit. Record the actual timing and status rather than assuming that a planned component was completed.

E Imaging and Objective Assessment Review

Review question	Yes	No	Finding / action / linked record
Were required imaging or objective assessments performed?	☐	☐	
Are results available and reviewed by an appropriately qualified person?	☐	☐	
Was an abnormal, unexpected or clinically relevant finding identified?	☐	☐	

F Participant-Reported Status Since Previous Visit

Open participant report: Record the participant's own relevant comments, including negative, persistent or positive changes. Do not classify a report as an adverse event solely within this section; refer it for the appropriate clinical or safety assessment when indicated.

Reported change / concern	Onset / duration / severity	Change since previous visit	Action / referral	Linked record
		☐ Improved ☐ Worse ☐ Unchanged		
		☐ Improved ☐ Worse ☐ Unchanged		
		☐ Improved ☐ Worse ☐ Unchanged		
		☐ Improved ☐ Worse ☐ Unchanged		

G Clinical and Physical Assessment

Assessment performed	Assessor / role	Method / instrument	Result / comparison with previous visit	Clinically relevant change / action

H Personnel and Continuity

Role / activity	Name / qualification	Same as previous visit?	Continuity, handover or supervision note
Operator / imaging assessor		☐ Yes ☐ No ☐ N/A	
Clinician / physical assessor		☐ Yes ☐ No ☐ N/A	
Physiotherapist / functional assessor		☐ Yes ☐ No ☐ N/A	

I Visit Compliance Review

Control point	Complete	Partial / No	Comment / reference
Visit followed the current protocol and visit instructions.	☐	☐	
Required assessments were performed using the intended method.	☐	☐	
Results and participant reports were documented and reviewed.	☐	☐	
Any deviation, delay, missing component or concern was recorded.	☐	☐	
Required referral, safety review or follow-up action was completed or assigned.	☐	☐	

J Visit Exception and Response

Use this section only when needed. Complete it for an exception, clinically relevant change, missing information, timing issue, unexpected finding or action requiring follow-up.

Signal / exception	Immediate response / impact	Linked record / escalation	Owner	Due date	Status
					☐ Open ☐ Closed
					☐ Open ☐ Closed
					☐ Open ☐ Closed
					☐ Open ☐ Closed
					☐ Open ☐ Closed

K Overall Visit Outcome

Outcome	Meaning	Select one
Compliant	Visit and relevant components were completed within the applicable scope and window.	☐
Compliant with observation	An observation exists, but it is documented with monitoring or follow-up as appropriate.	☐
Non-compliant / action required	A timing, completion, method, result or response issue requires action or escalation.	☐
Not assessable	There is insufficient information to determine the visit outcome.	☐
