PSEAR — PARTICIPANT SCREENING AND ELIGIBILITY ASSESSMENT RECORD

PSEAR · v0.7

Study / Protocol	Site / Code	Participant code	Screening no.
Date first identified	Screening opened	Current CIP / version	Applicable amendment
Recruitment pathway	Subject identification key / controlled location		Responsible assessor

A Participant identification and screening context

Purpose: This record is completed for one participant only. It documents the screening assessments, source evidence and criterion-level interpretation required before the participant may be enrolled in the clinical investigation.

Boundary: This record does not replace the subject identification log, source documents, the informed-consent record, the CRF, the CIP, deviation records or safety records. It does not aggregate participants or calculate recruitment performance.

Element	Complete when	Record / link
Participant unit	One copy is opened for one coded participant.	Participant code, screening number and controlled identification key.
Decision supported	All applicable screening activities and CIP criteria have been assessed.	Final eligibility decision in Section I.
Inputs	Approved CIP, required assessments and authoritative source records.	Source type, date and location; do not copy full narratives.
Outputs	Eligibility decision and controlled handoff to enrolment or closure.	Subject identification log, baseline record and next-phase instrument.

B Screening prerequisites and record boundaries

Prerequisite	Status	Evidence / record reference	Comments / limitation
Current approved CIP, amendment and eligibility requirements available	☐ Yes ☐ No ☐ Not applicable		
Participant code assigned and controlled source-record location confirmed	☐ Yes ☐ No ☐ Not applicable		
CIP-required screening activities and applicable screening window identified	☐ Yes ☐ No ☐ Not applicable		
Approved recruitment and screening pathway used	☐ Yes ☐ No ☐ Not applicable		
Consent status according to CIP and local requirements	☐ Obtained ☐ Not obtained ☐ Not applicable		
Consent-dependent assessments performed only after the required consent step	☐ Yes ☐ No ☐ Not applicable		

Use of Not applicable: select it only when the approved CIP or local process makes the item genuinely inapplicable, and record the justification in Comments / limitation.

C Required screening activities and source assessment record

List the assessments required for this participant by the approved CIP. Use one row for one meaningful assessment or assessment family. The example demonstrates the format only; it does not prescribe a universal test battery.

No.	Screening activity / assessment	Required by CIP?	Date performed	Performed by / function	Source record reference	Result / finding	Status
Example	*Protocol-defined shoulder MRI assessment for anatomical eligibility*	☑ *Yes* ☐ *No* ☐ *Not applicable*	*12 Sep 2026*	*AB / Study radiologist*	*MRI-SH-004 / radiology report*	*Images demonstrate adequate bone stock, assessable cuff morphology and no protocol-defined anatomical exclusion.*	☑ *Complete* ☐ *Incomplete* ☐ *Unavailable*
1		☐ Yes ☐ No ☐ Not applicable					☐ Complete ☐ Incomplete ☐ Unavailable
2		☐ Yes ☐ No ☐ Not applicable					☐ Complete ☐ Incomplete ☐ Unavailable
3		☐ Yes ☐ No ☐ Not applicable					☐ Complete ☐ Incomplete ☐ Unavailable
4		☐ Yes ☐ No ☐ Not applicable					☐ Complete ☐ Incomplete ☐ Unavailable
5		☐ Yes ☐ No ☐ Not applicable					☐ Complete ☐ Incomplete ☐ Unavailable
6		☐ Yes ☐ No ☐ Not applicable					☐ Complete ☐ Incomplete ☐ Unavailable
7		☐ Yes ☐ No ☐ Not applicable					☐ Complete ☐ Incomplete ☐ Unavailable

D Clinical, functional and participant-reported assessments

Assessment family / component	Instrument / method	Date	Result / score	Interpretation against CIP requirement	Source / assessor
Example. Functional assessment — shoulder function	*Constant–Murley Score (CMS)*	*12 Sep 2026*	*68 / 100*	*Score supports the current CIP functional requirement; no protocol-defined functional exclusion identified.*	*FA-SH-002 / CD, Study physiotherapist*
Participant-reported outcome					
Patient-reported symptoms: pain, discomfort, limitation, instability or swelling					
Physical assessment: range of motion, strength, stability, gait or tissue status					
Functional score or other protocol-defined clinical assessment					
Other study-specific assessment					

Important: completed rows are examples of possible assessment families only; complete labelled and blank rows according to the current CIP and applicable source records.

E Imaging and objective test assessment

No.	Modality / test	Date	Body region / target	Image / report reference	Adequate for decision?	Objective finding
Example	*MRI*	*12 Sep 2026*	*Protocol-defined shoulder*	*MRI-SH-004 / report*	☑ *Yes* ☐ *No* ☐ *Not applicable*	*Report documents preserved bone stock and a protocol-defined soft-tissue profile suitable for further eligibility interpretation.*
1					☐ Yes ☐ No ☐ Not applicable	
2					☐ Yes ☐ No ☐ Not applicable	
3					☐ Yes ☐ No ☐ Not applicable	

E Imaging and objective test assessment — eligibility interpretation

Imaging domain	Finding / eligibility interpretation	CIP requirement?	Source / reviewer
Osseous morphology and bone stock		☐ Yes ☐ No ☐ N/A	
Musculature quality and atrophy		☐ Yes ☐ No ☐ N/A	
Tendon integrity and morphology		☐ Yes ☐ No ☐ N/A	
Articular anatomy and structural suitability		☐ Yes ☐ No ☐ N/A	
Prior surgical intervention or anatomical alteration		☐ Yes ☐ No ☐ N/A	
Device–anatomy compatibility / other protocol-defined feature		☐ Yes ☐ No ☐ N/A	

F Indication and planned procedure pathway

Element	Finding / assessment	CIP requirement?	Source / reviewer
Indication for the planned procedure		☐ Yes ☐ No ☐ N/A	
Protocol-defined procedure or treatment pathway		☐ Yes ☐ No ☐ N/A	
Proposed device pathway, if applicable		☐ Yes ☐ No ☐ N/A	
Other study-specific compatibility requirement		☐ Yes ☐ No ☐ N/A	

Example: a study may record a procedure pathway such as reverse arthroplasty, but the actual terminology must be defined by the approved CIP rather than hard-coded into this generic record.

G Eligibility criterion verification against the current CIP

Transcribe or reference the criteria that apply to this participant from the current approved CIP. Do not invent criterion codes. One row represents one decision-relevant inclusion, exclusion or other protocol eligibility requirement.

No.	Criterion type	CIP criterion reference	Controlled wording / short description	Supporting evidence	Finding / result	Meets CIP requirement?
Example	☑ *Inclusion* ☐ *Exclusion* ☐ *Other*	*CIP §4.2.1*	*Protocol-defined anatomical suitability for the planned procedure.*	*MRI-SH-004 / radiology report dated 12 Sep 2026.*	*MRI demonstrates the protocol-defined osseous anatomy and no stated anatomical exclusion.*	☑ *Yes* ☐ *No* ☐ *Not assessable*
1	☐ Inclusion ☐ Exclusion ☐ Other					☐ Yes ☐ No ☐ Not assessable
2	☐ Inclusion ☐ Exclusion ☐ Other					☐ Yes ☐ No ☐ Not assessable
3	☐ Inclusion ☐ Exclusion ☐ Other					☐ Yes ☐ No ☐ Not assessable
4	☐ Inclusion ☐ Exclusion ☐ Other					☐ Yes ☐ No ☐ Not assessable
5	☐ Inclusion ☐ Exclusion ☐ Other					☐ Yes ☐ No ☐ Not assessable

H Additional review for imaging or multi-source criteria

No.	Criterion / issue requiring additional review	Reason additional review is required	Primary interpretation	Additional interpretation, if required	Review outcome	Reviewer / date
Example.	*Protocol-defined bone-stock criterion requiring imaging corroboration*	*Primary report described glenoid bone loss; second review required under the site review pathway.*	*Study radiologist: posterior glenoid bone loss estimated at 12%; no contraindicating defect identified.*	*Independent reviewer confirms adequate implant support and no protocol-defined anatomical exclusion.*	☑ *Confirmed* ☐ *Not confirmed* ☐ *Incomplete*	*EF / Investigator reviewer 13 Sep 2026*
1					☐ Confirmed ☐ Not confirmed ☐ Incomplete	
2					☐ Confirmed ☐ Not confirmed ☐ Incomplete	
3					☐ Confirmed ☐ Not confirmed ☐ Incomplete	

Decision rule: unresolved disagreement or missing required review means the eligibility decision is not ready and enrolment is not permitted. It is not a separate “borderline” eligibility category.

I Final eligibility decision

Complete only after all applicable screening activities and CIP criteria have been assessed. The decision must be supported by evidence available before enrolment. If a required item is incomplete, unavailable or not assessable, do not select Eligible.

Decision gate	Result	Evidence / limitation
All required screening activities complete	☐ Yes ☐ No ☐ Not applicable	
All applicable inclusion criteria met	☐ Yes ☐ No ☐ Not applicable	
No applicable exclusion criterion present	☐ Yes ☐ No ☐ Not applicable	
Supporting evidence available before decision	☐ Yes ☐ No ☐ Not applicable	
Required additional reviews complete	☐ Yes ☐ No ☐ Not applicable	

Eligibility decision	Decision rationale / linked evidence
☐ **Eligible** ☐ **Not eligible**	

J Open information, exception and immediate action route

No.	Missing item / affected criterion	Impact and immediate action	Owner	Due date	Status / resolution
1					☐ Open ☐ Resolved ☐ Decision changed
2					☐ Open ☐ Resolved ☐ Decision changed
3					☐ Open ☐ Resolved ☐ Decision changed

K Point of enrolment and controlled handoff

No.	Element	Record	Supporting reference
1	Eligibility decision date / time		
2	Enrolment date / time		
3	Enrolment occurred after eligibility decision	☐ Yes ☐ No ☐ Not applicable	
4	Point of enrolment defined by CIP		
5	Subject identification log reference		
6	Baseline / next-phase record		

Supporting reference: identify the controlled record that substantiates the entry, such as the applicable PSEAR section, source-record ID, CIP section, linked subject identification log entry or controlled filing location.

L Review, signatures and controlled record location

The responsible investigator or authorized reviewer confirms that the final decision is supported by the current CIP, the recorded assessments and the linked source documents. The controlled record location must permit reconstruction of the decision without relying on undocumented explanations.

Primary screening assessor

Name / role _____
