SIFSL - Subject Identification and Failure Screening Log

Log identification, purpose, status and categories

SIFSL · v0.5

Study / protocol	CIP version	Site / code	SIFSL ID / revision
Period covered / data cut-off	**Log owner / role**	**Identity key location (kept separately)**	**Controlled location**

A Purpose and use

The SIFSL lists every person considered for the investigation under a code, whatever happened next, with their current status and final outcome. It links each eligibility decision to its Participant Screening and Eligibility Assessment Record (PSEAR) and each enrollment to its record, so that at every cut-off the site can account for every candidate (D). It does not decide eligibility, which belongs to the PSEAR, and it does not calculate rates, which belong to the Performance Indicator Review (PIR).

Unit of analysis	Decision supported	Inputs	Outputs
One coded person on one line.	Whether every candidate is accounted for and linked to the PSEAR and enrollment records.	Referrals, current CIP, PSEAR and enrollment records.	Counts for the PIR (E); reconciliation issues (D).

B Status and non-inclusion categories

A category applies only to Not eligible, Withdrawn before enrollment and Closed: other outcome. It is administrative; the reasons stay in the PSEAR.

Status

Status	Use when	Also write on the line
Considered	Considered under a code; no formal screening yet.	First considered date
Screening active	Screening has started and is in progress.	Screening opened date, PSEAR ID
Awaiting eligibility decision	Evidence or review pending; never treated as eligible.	PSEAR ID
Eligible, awaiting enrollment	Eligible decision made; not yet enrolled.	PSEAR ID
Enrolled	Enrollment done.	PSEAR ID, enrollment record
Not eligible	The PSEAR decision does not allow inclusion.	PSEAR ID, category
Withdrawn before enrollment	The person or the process left before inclusion.	Category
Closed: other outcome	An outcome not covered above.	Category, controlled reference

Non-inclusion categories

Category	Use when
1 · Criterion not met	One or more criteria not met; details stay in the PSEAR.
2 · Assessment incomplete or unavailable	A required assessment was not done or not available in time.
3 · Consent or participant decision	Declined or withdrew; no personal detail.
4 · Screening stopped before a decision	Screening ended for a controlled reason before any decision.
5 · Study or site constraint	Recruitment closed, quota, or a sponsor or site decision.
6 · Other	Any other reason; cite the controlled record.

SIFSL - Subject Identification and Failure Screening Log

Candidate register

SIFSL ID / revision	Site / code	Data cut-off	Sheet no. / total sheets

C Candidate register

One line per coded person, numbered across sheets in the order first considered; update the same line when the status changes. Codes only: no names, initials, birth dates or contact details. Write the status name from B, and the category number only for a closed non-inclusion. A PSEAR is opened when screening starts and takes the candidate's number. Cite the PSEAR ID and the enrollment record; the content stays in those records. Issue ID comes from D.

#	Candidate code	First considered	Screening opened	Status	Status date	PSEAR ID	Non-inclusion category no.	Enrollment date · record	Issue ID

D Reconciliation at the cut-off

Check all sheets against the PSEAR and enrollment records. Correct a single issue in the record that owns it and note the correction here.

Checks

Check	Result	Evidence or issue ID
Every line has a code and a current status; every closed line has a final outcome.	☐ Yes ☐ No	
Every eligibility decision (eligible or not) has a PSEAR ID.	☐ Yes ☐ No	
Every enrolled person has both a PSEAR ID and an enrollment record, with matching dates.	☐ Yes ☐ No	
Every person still in screening has someone following up; every closed non-inclusion has a category.	☐ Yes ☐ No	
No duplicate code, and no PSEAR or enrollment record missing from the log.	☐ Yes ☐ No	

Issues found

Issue ID	Line or record · what is wrong	Correction (record and reference)	Owner · due date	Status

Counts, review and filing

E Counts at the cut-off

Count from all sheets. The PIR uses these counts; it, not this log, judges enrollment quality.

1 · Candidates by status

Status	Count	Lines (#)
Considered		
Screening active		
Awaiting eligibility decision		
Eligible, awaiting enrollment		
Enrolled		
Not eligible		
Withdrawn before enrollment		
Closed: other outcome		
All coded candidates (equals the last line number)		

2 · Closed non-inclusions by category and status

Category	Not eligible	Withdrawn before enrollment	Closed: other outcome	Total
1 · Criterion not met				
2 · Assessment incomplete or unavailable				
3 · Consent or participant decision				
4 · Screening stopped before a decision				
5 · Study or site constraint				
6 · Other				
Total (equals the counts in table 1)				

Counts sent to (record · owner · date)	

F Review and filing

Review result	☐ Reconciled ☐ Reconciled with open issues ☐ Not reconciled
